## Datasheet for ABIN3097883 TMED7 Protein (AA 35-224) (rho-1D4 tag)

Overview

Image

| Overview                      |  |
|-------------------------------|--|
| Quantity:                     | 1 mg   |
| Target:                       | TMED7  |
| Protein Characteristics:      | AA 35-224  |
| Origin:                       | Human  |
| Source:                       | Insect Cells   |
| Protein Type:                 | Recombinant  |
| Purification tag / Conjugate: | This TMED7 protein is labelled with rho-1D4 tag.   |
| Application:                  | Crystallization (Crys), ELISA, SDS-PAGE (SDS), Western Blotting (WB)   |
| Product Details               |  |
| Sequence:                     | SEITFELPDN AKQCFYEDIA QGTKCTLEFQ VITGGHYDVD CRLEDPDGKV LYKEMKKQYD  |
|                               | SFTFTASKNG TYKFCFSNEF STFTHKTVYF DFQVGEDPPL FPSENRVSAL TQMESACVSI  |
|                               | HEALKSVIDY QTHFRLREAQ GRSRAEDLNT RVAYWSVGEA LILLVVSIGQ VFLLKSFFSD  |
|                               | KRTTTTRVGS   |
|                               | Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a   |
|                               | special request, please contact us.  |
| Characteristics:              | <ul> <li>Made in Germany - from design to production - by highly experienced protein experts.</li> <li>Human TMED7 Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade.</li> <li>State-of-the-art algorithm used for plasmid design (Gene synthesis).</li> </ul> |
|                               | This protein is a made to order protein and will be made for the first time for your order. Our  |

experts in the lab will ensure that you receive a correctly folded protein.

|                   | The big advantage of ordering our made-to-order proteins in comparison to ordering custom   |
|-------------------|---|
|                   | made proteins from other companies is that there is no financial obligation in case the protein   |
|                   | cannot be expressed or purified.  |
|                   | In the unlikely event that the protein cannot be expressed or purified we do not charge anything  |
|                   | (other companies might charge you for any performed steps in the expression process for   |
|                   | custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression  |
|                   | experiments or purification optimization).  |
|                   | When you order this made-to-order protein you will only pay upon receival of the correctly  |
|                   | folded protein. With no financial risk on your end you can rest assured that our experienced  |
|                   | protein experts will do everything to make sure that you receive the protein you ordered.   |
|                   | The concentration of our recombinant proteins is measured using the absorbance at 280nm.  |
|                   | The protein's absorbance will be measured in several dilutions and is measured against its  |
|                   | specific reference buffer.  |
|                   | The concentration of the protein is calculated using its specific absorption coefficient. We use  |
|                   | the Expasy's protparam tool to determine the absorption coefficient of each protein.  |
| Purification:     | Three step purification of membrane proteins expressed in baculovirus infected SF9 insect   |
|                   | cells:  |
|                   | 1. Membrane proteins are fractioned by ultracentrifugation and subsequently solubilized with  |
|                   | different detergents (detergent screen). Samples are analyzed by Western blot.  |
|                   | <ol> <li>The best performing detergent is used for solubilization and the proteins are purified via their<br/>rho1D4 tag via two rho1D4 antibody columns: one DTT resistant, the other one not. Eluate<br/>fractions are analyzed by Western blot.</li> </ol> |
|                   | 3. Protein containing fractions of the best purification are subjected to second purification step  |
|                   | through size exclusion chromatograph. Eluate fractions are analyzed by SDS-PAGE and Western blot.   |
| Purity:           | >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.  |
| Sterility:        | 0.22 µm filtered  |
| Endotoxin Level:  | Protein is endotoxin-free.  |
| Grade:            | Crystallography grade   |
| Target Details    |   |
| Target:           | TMED7   |
| Alternative Name: | TMED7 (TMED7 Products)  |
| Background:       | Potential role in vesicular protein trafficking, mainly in the early secretory pathway. Appears to  |

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 2/4 | Product datasheet for ABIN3097883 | 09/11/2023 | Copyright antibodies-online. | Target Details      |  |
|---------------------|--|
|                     | play a role in the biosynthesis of secreted cargo including processing and post-translational modifications.   |
| Molecular Weight:   | 22.9 kDa Including tag.  |
| UniProt:            | Q9Y3B3   |
| Application Details |  |
| Application Notes:  | In addition to the applications listed above we expect the protein to work for functional studies<br>as well. As the protein has not been tested for functional studies yet we cannot offer a<br>guarantee though.   |
| Comment:            | In cases in which it is highly likely that the recombinant protein with the default tag will be<br>insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to<br>increase solubility. We will discuss all possible options with you in detail to assure that you<br>receive your protein of interest. |
| Restrictions:       | For Research Use only  |
| Handling            |  |
| Format:             | Liquid   |
| Buffer:             | 100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.   |
| Handling Advice:    | Avoid repeated freeze-thaw cycles.   |
| Storage:            | -80 °C   |
| Storage Comment:    | Store at -80°C.  |
| Expiry Date:        | Unlimited (if stored properly)   |

**Image 1.** "Crystallography Grade" protein due to multi-step, protein-specific purification process
