

# Datasheet for ABIN3101095 TSPO2 Protein (AA 1-170) (Strep Tag)

Overview

Quantity:	250 µg
Target:	TSP02
Protein Characteristics:	AA 1-170
Origin:	Human
Source:	Cell-free protein synthesis (CFPS)
Protein Type:	Recombinant
Purification tag / Conjugate:	This TSPO2 protein is labelled with Strep Tag.
Application:	ELISA, SDS-PAGE (SDS), Western Blotting (WB)

## Product Details

Brand:	AliCE®
Sequence:	MRLQGAIFVL LPHLGPILVW LFTRDHMSGW CEGPRMLSWC PFYKVLLLVQ TAIYSVVGYA
	SYLVWKDLGG GLGWPLALPL GLYAVQLTIS WTVLVLFFTV HNPGLALLHL LLLYGLVVST
	ALIWHPINKL AALLLLPYLA WLTVTSALTY HLWRDSLCPV HQPQPTEKSD
	Sequence without tag. The proposed Strep-Tag is based on experience s with the expression
	system, a different complexity of the protein could make another tag necessary. In case you
	have a special request, please contact us.
Characteristics:	Key Benefits:
	Made in Germany - from design to production - by highly experienced protein experts.
	<ul> <li>Protein expressed with ALiCE® and purified in one-step affinity chromatography</li> </ul>
	These proteins are normally active (enzymatically functional) as our customers have
	reported (not tested by us and not guaranteed).

This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

#### Expression System:

- ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require posttranslational modifications.
- During lysate production, the cell wall and other cellular components that are not required for
  protein production are removed, leaving only the protein production machinery and the
  mitochondria to drive the reaction. During our lysate completion steps, the additional
  components needed for protein production (amino acids, cofactors, etc.) are added to
  produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

#### Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- The protein's absorbance will be measured against its specific reference buffer.
- We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.

Purification:	One-step Strep-tag purification of proteins expressed in Almost Living Cell-Free Expression System (AliCE®).
Purity:	> 70-80 % as determined by SDS PAGE, Western Blot and analytical SEC (HPLC).
Grade:	custom-made

### Target Details

Target:	TSP02
Alternative Name:	TSP02 (TSP02 Products)
Background:	Translocator protein 2 (Peripheral-type benzodiazepine receptor-like protein 1),FUNCTION:
	Cholesterol-binding protein involved in the redistribution of cholesterol from lipid droplets to the

Storage:	-80 °C
Handling Advice:	Avoid repeated freeze-thaw cycles.
	Standard Storage Buffer: PBS pH 7.4, 10 % Glycerol <b>Might differ depending on protein.</b>
Format: Buffer:	Liquid The buffer composition is at the discretion of the manufacturer.
