

Datasheet for ABIN3101778 SCIMP Protein (AA 1-145) (Strep Tag)

Overview

Quantity:	250 μg
Target:	SCIMP
Protein Characteristics:	AA 1-145
Origin:	Human
Source:	Cell-free protein synthesis (CFPS)
Protein Type:	Recombinant
Purification tag / Conjugate:	This SCIMP protein is labelled with Strep Tag.
Application:	Western Blotting (WB), ELISA, SDS-PAGE (SDS)

Product Details

Brand:	Alice®
Sequence:	MDTFTVQDST AMSWWRNNFW IILAVAIIVV SVGLGLILYC VCKWQLRRGK KWEIAKPLKH
	KQVDEEKMYE NVLNESPVQL PPLPPRNWPS LEDSSPQEAP SQPPATYSLV NKVKNKKTVS
	IPSYIEPEDD YDDVEIPANT EKASF
	Sequence without tag. The proposed Strep-Tag is based on experience s with the expression
	system, a different complexity of the protein could make another tag necessary. In case you
	have a special request, please contact us.
Characteristics:	Key Benefits:
	• Made in Germany - from design to production - by highly experienced protein experts.
	Protein expressed with ALiCE® and purified in one-step affinity chromatography
	These proteins are normally active (enzymatically functional) as our customers have
	reported (not tested by us and not guaranteed).

All rights reserved. • State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Expression System:

- ALICE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require post-translational modifications.
- During lysate production, the cell wall and other cellular components that are not required for
 protein production are removed, leaving only the protein production machinery and the
 mitochondria to drive the reaction. During our lysate completion steps, the additional
 components needed for protein production (amino acids, cofactors, etc.) are added to
 produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- The protein's absorbance will be measured against its specific reference buffer.
- We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.

Purification:	One-step Strep-tag purification of proteins expressed in Almost Living Cell-Free Expression System (AliCE®).
Purity:	> 70-80 % as determined by SDS PAGE, Western Blot and analytical SEC (HPLC).
Grade:	custom-made

Target Details

Target:	SCIMP
Alternative Name:	SCIMP (SCIMP Products)
Background:	SLP adapter and CSK-interacting membrane protein (SLP65/SLP76, Csk-interacting membrane
	protein),FUNCTION: Lipid tetraspanin-associated transmembrane adapter/mediator that acts

	as a scaffold for Src-family kinases and other signaling proteins in immune cells
	(PubMed:21930792). It is involved in major histocompatibility complex class II (MHC-II)
	signaling transduction in B cells, where it is required in generating the calcium response and
	enhancing ERK activity upon MHC-II stimulation (PubMed:21930792). In dendritic cells, it is
	involved in sustaining CLEC7A/DECTIN1 signaling after CLEC7A activation by fungal beta-
	glucans (By similarity). It also acts as an agonist-inducible signaling adapter for TLR1, TLR2,
	TLR3, TLR4, and TLR7 by selectively enabling the expression of pro-inflammatory cytokines IL6
	and IL12B in macrophages and acting as a scaffold for phosphorylation of Toll-like receptors by
	Src-family kinases (By similarity). {ECO:0000250 UniProtKB:Q3UU41,
	ECO:0000269 PubMed:21930792}.
Molecular Weight:	16.6 kDa
UniProt:	Q6UWF3
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a
	guarantee though.
Comment:	ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from
	Nicotiana tabacum c.v This contains all the protein expression machinery needed to produce
	even the most difficult-to-express proteins, including those that require post-translational modifications.
	During lysate production, the cell wall and other cellular components that are not required for
	protein production are removed, leaving only the protein production machinery and the
	mitochondria to drive the reaction. During our lysate completion steps, the additional
	components needed for protein production (amino acids, cofactors, etc.) are added to produce
	something that functions like a cell, but without the constraints of a living system - all that's
	needed is the DNA that codes for the desired protein!
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer.
	Standard Storage Buffer: PBS pH 7.4, 10 % Glycerol Might differ depending on protein.

Handling

Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	12 months
