antibodies

Datasheet for ABIN3104548 CLEC4D Protein (AA 1-215) (Strep Tag)

Overview

| Quantity: | 1 mg |
|-------------------------------|---|
| Target: | CLEC4D |
| Protein Characteristics: | AA 1-215 |
| Origin: | Human |
| Source: | Tobacco (Nicotiana tabacum) |
| Protein Type: | Recombinant |
| Purification tag / Conjugate: | This CLEC4D protein is labelled with Strep Tag. |
| Application: | SDS-PAGE (SDS), Western Blotting (WB), ELISA |

Product Details

| Sequence: | MGLEKPQSKL EGGMHPQLIP SVIAVVFILL LSVCFIASCL VTHHNFSRCK RGTGVHKLEH |
|------------------|--|
| | HAKLKCIKEK SELKSAEGST WNCCPIDWRA FQSNCYFPLT DNKTWAESER NCSGMGAHLM |
| | TISTEAEQNF IIQFLDRRLS YFLGLRDENA KGQWRWVDQT PFNPRRVFWH KNEPDNSQGE |
| | NCVVLVYNQD KWAWNDVPCN FEASRICKIP GTTLN |
| | Sequence without tag. The proposed Strep-Tag is based on experience s with the expression |
| | system, a different complexity of the protein could make another tag necessary. In case you |
| | have a special request, please contact us. |
| Characteristics: | Key Benefits: |
| | • Made in Germany - from design to production - by highly experienced protein experts. |
| | Protein expressed with ALiCE® and purified by multi-step, protein-specific process to ensure |
| | |
| | correct folding and modification. |

• State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein.

The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Expression System:

• ALICE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require post-translational modifications.

During lysate production, the cell wall and other cellular components that are not required for
protein production are removed, leaving only the protein production machinery and the
mitochondria to drive the reaction. During our lysate completion steps, the additional
components needed for protein production (amino acids, cofactors, etc.) are added to
produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- The protein's absorbance will be measured in several dilutions and is measured against its specific reference buffer.
- We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.

| Purification: | Two step purification of proteins expressed in Almost Living Cell-Free Expression System |
|------------------|--|
| | (ALICE®): |
| | 1. In a first purification step, the protein is purified from the cleared cell lysate using StrepTag |
| | capture material. Eluate fractions are analyzed by SDS-PAGE. |
| | 2. Protein containing fractions of the best purification are subjected to second purification step |
| | through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and |
| | Western blot. |
| Purity: | >80 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot. |
| Endotoxin Level: | Low Endotoxin less than 1 EU/mg (< 0.1 ng/mg) |
| | |

Target Details

Comment:

| Target: | CLEC4D |
|---------------------|---|
| Alternative Name: | CLEC4D (CLEC4D Products) |
| Background: | C-type lectin domain family 4 member D (C-type lectin superfamily member 8) (C-type lectin-lik |
| | receptor 6) (CLEC-6) (Dendritic cell-associated C-type lectin 3) (DC-associated C-type lectin 3) |
| | (Dectin-3) (CD antigen CD368),FUNCTION: Calcium-dependent lectin that acts as a pattern |
| | recognition receptor (PRR) of the innate immune system: recognizes damage-associated |
| | molecular patterns (DAMPs) of pathogen-associated molecular patterns (PAMPs) of bacteria |
| | and fungi (PubMed:23602766, PubMed:23911656). The PAMPs include alpha-mannans on |
| | C.albicans hypheas and mycobacterial trehalose 6,6'-dimycolate (TDM) (PubMed:23602766, |
| | PubMed:23911656). Interacts with signaling adapter Fc receptor gamma chain/FCER1G, likely |
| | via CLEC4E, to form a functional complex in myeloid cells (By similarity). Binding of |
| | mycobacterial TDM or C.albicans alpha-mannans to this receptor complex leads to |
| | phosphorylation of the immunoreceptor tyrosine-based activation motif (ITAM) of FCER1G, |
| | triggering activation of SYK, CARD9 and NF-kappa-B, consequently driving maturation of |
| | antigen-presenting cells and shaping antigen-specific priming of T-cells toward effector T- |
| | helper 1 and T-helper 17 cell subtypes (PubMed:23602766, PubMed:23911656). The |
| | heterodimer formed with CLEC6A is active against fungal infection (PubMed:23911656). |
| | Functions as an endocytic receptor (PubMed:14971047). May be involved in antigen uptake at |
| | the site of infection, either for clearance of the antigen, or for processing and further |
| | presentation to T-cells (PubMed:14971047). {ECO:0000250 UniProtKB:Q69FH1, |
| | EC0:0000269 PubMed:14971047, EC0:0000269 PubMed:23602766, |
| | EC0:0000269 PubMed:23911656}. |
| Molecular Weight: | 24.7 kDa |
| UniProt: | Q8WXI8 |
| Application Details | |
| Application Notes: | In addition to the applications listed above we expect the protein to work for functional studies |
| | as well. As the protein has not been tested for functional studies yet we cannot offer a |
| | quarantee though |

guarantee though.

For Research Use only

Handling

| Format: | Liquid |
|------------------|--|
| Buffer: | The buffer composition is at the discretion of the manufacturer. If you have a special request, please contact us. |
| Handling Advice: | Avoid repeated freeze-thaw cycles. |
| Storage: | -80 °C |
| Storage Comment: | Store at -80°C. |
| Expiry Date: | Unlimited (if stored properly) |
