

### Datasheet for ABIN3109426

# SLC17A3 Protein (AA 1-420) (Strep Tag)

### Overview

Quantity:	250 μg
Target:	SLC17A3
Protein Characteristics:	AA 1-420
Origin:	Human
Source:	Cell-free protein synthesis (CFPS)
Protein Type:	Recombinant
Purification tag / Conjugate:	This SLC17A3 protein is labelled with Strep Tag.
Application:	ELISA, Western Blotting (WB), SDS-PAGE (SDS)

Application:	ELISA, Western Blotting (WB), SDS-PAGE (SDS)
Product Details	
Brand:	AliCE®
Sequence:	MATKTELSPT ARESKNAQDM QVDETLIPRK VPSLCSARYG IALVLHFCNF TTIAQNVIMN
	ITMVAMVNST SPQSQLNDSS EVLPVDSFGG LSKAPKSLPA KSSILGGQFA IWEKWGPPQE
	RSRLCSIALS GMLLGCFTAI LIGGFISETL GWPFVFYIFG GVGCVCCLLW FVVIYDDPVS
	YPWISTSEKE YIISSLKQQV GSSKQPLPIK AMLRSLPIWS ICLGCFSHQW LVSTMVVYIP
	TYISSVYHVN IRDNGLLSAL PFIVAWVIGM VGGYLADFLL TKKFRLITVR KIATILGSLP
	SSALIVSLPY LNSGYITATA LLTLSCGLST LCQSGIYINV LDIAPRYSSF LMGASRGFSS
	IAPVIVPTVS GFLLSQDPEF GWRNVFFLLF AVNLLGLLFY LIFGEADVQE WAKERKLTRL
	Sequence without tag. The proposed Strep-Tag is based on experience s with the expression
	system, a different complexity of the protein could make another tag necessary. In case you
	have a special request, please contact us.
Characteristics:	Key Benefits:

- Made in Germany from design to production by highly experienced protein experts.
- · Protein expressed with ALiCE® and purified in one-step affinity chromatography
- These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed).
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

#### Expression System:

- ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require posttranslational modifications.
- During lysate production, the cell wall and other cellular components that are not required for
  protein production are removed, leaving only the protein production machinery and the
  mitochondria to drive the reaction. During our lysate completion steps, the additional
  components needed for protein production (amino acids, cofactors, etc.) are added to
  produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

#### Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- The protein's absorbance will be measured against its specific reference buffer.
- · We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.

Purification:	One-step Strep-tag purification of proteins expressed in Almost Living Cell-Free Expression System (AliCE®).
Purity:	> 70-80 % as determined by SDS PAGE, Western Blot and analytical SEC (HPLC).
Grade:	custom-made
Target Details	
Target:	SLC17A3

# Target Details

Alternative Name:	SLC17A3 (SLC17A3 Products)
Background:	Sodium-dependent phosphate transport protein 4 (Na(+)/PI cotransporter 4) (NPT4)
	(Sodium/phosphate cotransporter 4) (Solute carrier family 17 member 3),FUNCTION: [Isoform
	2]: Transports organic anions in a voltage-driven, multispecific, manner, on the apical side of
	renal proximal tubule (PubMed:20810651). In particular, participates in the secretion of urate
	from the cell into the lumen (PubMed:20810651). Urate is the end product of purine
	metabolism (PubMed:20810651). May have roles in the metabolism and secretion of estrone
	sulfate, estradiol-17-beta-glucuronide, ochratoxin A, as wells as drugs such as bumetanide
	(PubMed:20810651). {ECO:0000269 PubMed:20810651, ECO:0000303 PubMed:20810651}.
Molecular Weight:	46.1 kDa
UniProt:	000476
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a
	guarantee though.
Comment:	ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from
	Nicotiana tabacum c.v This contains all the protein expression machinery needed to produce
	even the most difficult-to-express proteins, including those that require post-translational modifications.
	During lysate production, the cell wall and other cellular components that are not required for
	protein production are removed, leaving only the protein production machinery and the
	mitochondria to drive the reaction. During our lysate completion steps, the additional
	components needed for protein production (amino acids, cofactors, etc.) are added to produce
	something that functions like a cell, but without the constraints of a living system - all that's
	needed is the DNA that codes for the desired protein!
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer.
	Standard Storage Buffer: PBS pH 7.4, 10 % Glycerol Might differ depending on protein.

# Handling

Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	12 months
