antibodies

## Datasheet for ABIN3110084 TWEAK Protein (AA 94-249) (rho-1D4 tag)

Overview

| Quantity:                     | 1 mg  |
|-------------------------------|---|
| Target:                       | TWEAK (TNFSF12)   |
| Protein Characteristics:      | AA 94-249   |
| Origin:                       | Human   |
| Source:                       | Insect Cells  |
| Protein Type:                 | Recombinant   |
| Purification tag / Conjugate: | This TWEAK protein is labelled with rho-1D4 tag.  |
| Application:                  | SDS-PAGE (SDS), Western Blotting (WB), ELISA, Crystallization (Crys)                            |
| Product Details               |   |
| Sequence:                     | SAPKGRKTRA RRAIAAHYEV HPRPGQDGAQ AGVDGTVSGW EEARINSSSP LRYNRQIGEF                               |
|                               | IVTRAGLYYL YCQVHFDEGK AVYLKLDLLV DGVLALRCLE EFSATAASSL GPQLRLCQVS                               |
|                               | GLLALRPGSS LRIRTLPWAH LKAAPFLTYF GLFQVH   |
|                               | Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a      |
|                               | special request, please contact us.   |
| Characteristics:              | Made in Germany - from design to production - by highly experienced protein experts.            |
|                               | Human TNFSF12 Protein (raised in Insect Cells) purified by multi-step, protein-specific         |
|                               | process to ensure crystallization grade.  |
|                               | • State-of-the-art algorithm used for plasmid design (Gene synthesis).                          |
|                               | This protein is a made to order protein and will be made for the first time for your order. Our |
|                               |   |

experts in the lab will ensure that you receive a correctly folded protein.

The big advantage of ordering our made-to-order proteins in comparison to ordering custom

|                   | made proteins from other companies is that there is no financial obligation in case the protein   |
|-------------------|---|
|                   | cannot be expressed or purified.  |
|                   | In the unlikely event that the protein cannot be expressed or purified we do not charge anything  |
|                   | (other companies might charge you for any performed steps in the expression process for   |
|                   | custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression  |
|                   | experiments or purification optimization).  |
|                   | When you order this made-to-order protein you will only pay upon receival of the correctly  |
|                   | folded protein. With no financial risk on your end you can rest assured that our experienced  |
|                   | protein experts will do everything to make sure that you receive the protein you ordered.   |
|                   | The concentration of our recombinant proteins is measured using the absorbance at 280nm.  |
|                   | The protein's absorbance will be measured in several dilutions and is measured against its  |
|                   | specific reference buffer.  |
|                   | The concentration of the protein is calculated using its specific absorption coefficient. We use  |
|                   | the Expasy's protparam tool to determine the absorption coefficient of each protein.  |
| Purification:     | Three step purification of membrane proteins expressed in baculovirus infected SF9 insect   |
|                   | cells:  |
|                   | 1. Membrane proteins are fractioned by ultracentrifugation and subsequently solubilized with  |
|                   | different detergents (detergent screen). Samples are analyzed by Western blot.<br>2. The best performing detergent is used for solubilization and the proteins are purified via thei  |
|                   | rho1D4 tag via two rho1D4 antibody columns: one DTT resistant, the other one not. Eluate  |
|                   | fractions are analyzed by Western blot.   |
|                   | <ol> <li>Protein containing fractions of the best purification are subjected to second purification step<br/>through size exclusion chromatograph. Eluate fractions are analyzed by SDS-PAGE and<br/>Western blot.</li> </ol> |
| Purity:           | >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.  |
| Sterility:        | 0.22 µm filtered  |
| Endotoxin Level:  | Protein is endotoxin-free.  |
| Grade:            | Crystallography grade   |
| Target Details    |   |
| Target:           | TWEAK (TNFSF12)   |
| Alternative Name: | TNFSF12 (TNFSF12 Products)  |
| Background:       | Binds to FN14 and possibly also to TNRFSF12/APO3. Weak inducer of apoptosis in some cell  |
|                   |   |

| Target Details      |  |
|---------------------|--|
|                     | endothelial cells. Also involved in induction of inflammatory cytokines. Promotes IL8 secretion.<br>{ECO:0000269 PubMed:10085077, ECO:0000269 PubMed:23667509}.  |
| Molecular Weight:   | 18.4 kDa Including tag.  |
| UniProt:            | 043508   |
| Pathways:           | Apoptosis  |
| Application Details |  |
| Application Notes:  | In addition to the applications listed above we expect the protein to work for functional studies<br>as well. As the protein has not been tested for functional studies yet we cannot offer a<br>guarantee though.   |
| Comment:            | In cases in which it is highly likely that the recombinant protein with the default tag will be<br>insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to<br>increase solubility. We will discuss all possible options with you in detail to assure that you<br>receive your protein of interest. |
| Restrictions:       | For Research Use only  |
| Handling            |  |
| Format:             | Liquid   |
| Buffer:             | 100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.   |
| Handling Advice:    | Avoid repeated freeze-thaw cycles.   |
| Storage:            | -80 °C   |
| Storage Comment:    | Store at -80°C.  |
| Expiry Date:        | Unlimited (if stored properly)   |

**Image 1.** "Crystallography Grade" protein due to multi-step, protein-specific purification process
