Datasheet for ABIN3110145 NDUFB5 Protein (AA 47-189) (rho-1D4 tag)

Overview

Image

Uverview	
Quantity:	1 mg
Target:	NDUFB5
Protein Characteristics:	AA 47-189
Origin:	Human
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This NDUFB5 protein is labelled with rho-1D4 tag.
Application:	ELISA, Western Blotting (WB), SDS-PAGE (SDS), Crystallization (Crys)
Product Details	
Sequence:	SGDHGKRLFV IRPSRFYDRR FLKLLRFYIA LTGIPVAIFI TLVNVFIGQA ELAEIPEGYV
	PEHWEYYKHP ISRWIARNFY DSPEKIYERT MAVLQIEAEK AELRVKELEV RKLMHVRGDG
	PWYYYETIDK ELIDHSPKAT PDN
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	Made in Germany - from design to production - by highly experienced protein experts.
	Human NDUFB5 Protein (raised in Insect Cells) purified by multi-step, protein-specific
	process to ensure crystallization grade.
	State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made to order protein and will be made for the first time for your order. Our
	experts in the lab will ensure that you receive a correctly folded protein.

Background:	Accessory subunit of the mitochondrial membrane respiratory chain NADH dehydrogenase
Alternative Name:	NDUFB5 (NDUFB5 Products)
Target:	NDUFB5
Target Details	
Grade:	Crystallography grade
Endotoxin Level:	Protein is endotoxin-free.
Sterility:	0.22 µm filtered
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
	 cells: 1. Membrane proteins are fractioned by ultracentrifugation and subsequently solubilized with different detergents (detergent screen). Samples are analyzed by Western blot. 2. The best performing detergent is used for solubilization and the proteins are purified via their rho1D4 tag via two rho1D4 antibody columns: one DTT resistant, the other one not. Eluate fractions are analyzed by Western blot. 3. Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatograph. Eluate fractions are analyzed by SDS-PAGE and Western blot.
Purification:	Three step purification of membrane proteins expressed in baculovirus infected SF9 insect
	specific reference buffer. The concentration of the protein is calculated using its specific absorption coefficient. We use the Expasy's protparam tool to determine the absorption coefficient of each protein.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm. The protein's absorbance will be measured in several dilutions and is measured against its
	folded protein. With no financial risk on your end you can rest assured that our experienced protein experts will do everything to make sure that you receive the protein you ordered.
	When you order this made-to-order protein you will only pay upon receival of the correctly
	experiments or purification optimization).
	(other companies might charge you for any performed steps in the expression process for custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	cannot be expressed or purified.
	made proteins from other companies is that there is no financial obligation in case the protein

(Complex I), that is believed not to be involved in catalysis. Complex I functions in the transfer

Target Details	
	of electrons from NADH to the respiratory chain. The immediate electron acceptor for the enzyme is believed to be ubiquinone.
Molecular Weight:	18.2 kDa Including tag.
UniProt:	043674
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
