

# Datasheet for ABIN3110666 ENTPD6 Protein (AA 1-484) (Strep Tag)

### Overview

Quantity:	250 μg
Target:	ENTPD6
Protein Characteristics:	AA 1-484
Origin:	Human
Source:	Cell-free protein synthesis (CFPS)
Protein Type:	Recombinant
Purification tag / Conjugate:	This ENTPD6 protein is labelled with Strep Tag.
Application:	SDS-PAGE (SDS), ELISA, Western Blotting (WB)

Application:	SDS-PAGE (SDS), ELISA, Western Blotting (WB)
Product Details	
Brand:	AliCE®
Sequence:	MKKGIRYETS RKTSYIFQQP QHGPWQTRMR KISNHGSLRV AKVAYPLGLC VGVFIYVAYI
	KWHRATATQA FFSITRAAPG ARWGQQAHSP LGTAADGHEV FYGIMFDAGS TGTRVHVFQF
	TRPPRETPTL THETFKALKP GLSAYADDVE KSAQGIRELL DVAKQDIPFD FWKATPLVLK
	ATAGLRLLPG EKAQKLLQKV KKVFKASPFL VGDDCVSIMN GTDEGVSAWI TINFLTGSLK
	TPGGSSVGML DLGGGSTQIA FLPRVEGTLQ ASPPGYLTAL RMFNRTYKLY SYSYLGLGLM
	SARLAILGGV EGQPAKDGKE LVSPCLSPSF KGEWEHAEVT YRVSGQKAAA SLHELCAARV
	SEVLQNRVHR TEEVKHVDFY AFSYYYDLAA GVGLIDAEKG GSLVVGDFEI AAKYVCRTLE
	TQPQSSPFSC MDLTYVSLLL QEFGFPRSKV LKLTRKIDNV ETSWALGAIF HYIDSLNRQK SPAS
	Sequence without tag. The proposed Strep-Tag is based on experience s with the expression
	system, a different complexity of the protein could make another tag necessary. In case you
	have a special request, please contact us.

#### Characteristics:

#### Key Benefits:

- Made in Germany from design to production by highly experienced protein experts.
- · Protein expressed with ALiCE® and purified in one-step affinity chromatography
- These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed).
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

#### Expression System:

- ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require posttranslational modifications.
- During lysate production, the cell wall and other cellular components that are not required for
  protein production are removed, leaving only the protein production machinery and the
  mitochondria to drive the reaction. During our lysate completion steps, the additional
  components needed for protein production (amino acids, cofactors, etc.) are added to
  produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

#### Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- The protein's absorbance will be measured against its specific reference buffer.
- · We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.

Purification:	One-step Strep-tag purification of proteins expressed in Almost Living Cell-Free Expression System (AliCE®).
Purity:	> 70-80 % as determined by SDS PAGE, Western Blot and analytical SEC (HPLC).
Grade:	custom-made

## **Target Details**

Target:	ENTPD6
Alternative Name:	ENTPD6 (ENTPD6 Products)
Background:	Ectonucleoside triphosphate diphosphohydrolase 6 (NTPDase 6) (EC 3.6.1.6) (CD39 antigen-
	like 2),FUNCTION: Catalyzes the hydrolysis of nucleoside triphosphates and diphosphates in a
	calcium- or magnesium-dependent manner. Has a strong preference for nucleoside
	diphosphates, preferentially hydrolyzes GDP, IDP, and UDP, with slower hydrolysis of CDP, ITP,
	GTP, CTP, ADP, and UTP and virtually no hydrolysis of ATP (PubMed:10948193,
	PubMed:14529283, PubMed:11041856). The membrane bound form might support
	glycosylation reactions in the Golgi apparatus and, when released from cells, might catalyze the
	hydrolysis of extracellular nucleotides (PubMed:10948193, PubMed:14529283,
	PubMed:11041856). {ECO:0000269 PubMed:10948193, ECO:0000269 PubMed:11041856,
	ECO:0000269 PubMed:14529283}.
Molecular Weight:	53.2 kDa
UniProt:	075354

# Handling

Buffer:	The buffer composition is at the discretion of the manufacturer.  Standard Storage Buffer: PBS pH 7.4, 10 % Glycerol <b>Might differ depending on protein.</b>
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	12 months
