Datasheet for ABIN3113048 ITGB6 Protein (AA 22-788) (rho-1D4 tag)

Overview

Quantity:	1 mg
Target:	ITGB6
Protein Characteristics:	AA 22-788
Origin:	Human
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This ITGB6 protein is labelled with rho-1D4 tag.
Application:	Western Blotting (WB), SDS-PAGE (SDS), ELISA, Crystallization (Crys)

Product Details

	VAKFEAERSK AKWQTGTNPL YRGSTSTFKN VTYKHREKQK VDLSTDC
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	 Made in Germany - from design to production - by highly experienced protein experts. Human ITGB6 Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade. State-of-the-art algorithm used for plasmid design (Gene synthesis).
	• State-or-the-art algorithm used for plasmid design (Gene Synthesis).
	This protein is a made to order protein and will be made for the first time for your order. Our
	experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Three step purification of membrane proteins expressed in baculovirus infected SF9 insect cells:
	1. Membrane proteins are fractioned by ultracentrifugation and subsequently solubilized with different detergents (detergent screen). Samples are analyzed by Western blot.
	2. The best performing detergent is used for solubilization and the proteins are purified via their rho1D4 tag via two rho1D4 antibody columns: one DTT resistant, the other one not. Eluate fractions are analyzed by Western blot.
	 Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatograph. Eluate fractions are analyzed by SDS-PAGE and Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered

Product Details	
Endotoxin Level:	Protein is endotoxin-free.
Grade:	Crystallography grade

Target Details

Buffer:

Target:	ITGB6
Alternative Name:	ITGB6 (ITGB6 Products)
Background:	Integrin alpha-V/beta-6 is a receptor for fibronectin and cytotactin. It recognizes the sequence
	R-G-D in its ligands. Internalisation of integrin alpha-V/beta-6 via clathrin-mediated endocytosis
	promotes carcinoma cell invasion. {ECO:0000269 PubMed:17545607}., (Microbial infection)
	Integrin ITGAV:ITGB6 acts as a receptor for coxsackievirus A9 and coxsackievirus B1
	(PubMed:9426447, PubMed:15194773). Integrin ITGAV:ITGB6 acts as a receptor for herpes
	simplex virus-1/HHV-1 (PubMed:24367260). {ECO:0000269 PubMed:15194773,
	ECO:0000269 PubMed:24367260, ECO:0000269 PubMed:9426447}.
Molecular Weight:	84.7 kDa Including tag.
UniProt:	P18564
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee
	though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be
	insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to
	increase solubility. We will discuss all possible options with you in detail to assure that you
	receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid

100) mM NaCL,	20 mM Hepes,	10% glycerol.	pH value is a	it the discretion of	the manufacturer.

 Handling Advice:
 Avoid repeated freeze-thaw cycles.

 Storage:
 -80 °C
