## Datasheet for ABIN3114354 MST1R Protein (AA 25-304) (rho-1D4 tag)

Overview

Quantity:	1 mg
Target:	MST1R
Protein Characteristics:	AA 25-304
Origin:	Human
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This MST1R protein is labelled with rho-1D4 tag.
Application:	Western Blotting (WB), SDS-PAGE (SDS), ELISA, Crystallization (Crys)

#### Product Details

Sequence:	EDWQCPRTPY AASRDFDVKY VVPSFSAGGL VQAMVTYEGD RNESAVFVAI RNRLHVLGPD
	LKSVQSLATG PAGDPGCQTC AACGPGPHGP PGDTDTKVLV LDPALPALVS CGSSLQGRCF
	LHDLEPQGTA VHLAAPACLF SAHHNRPDDC PDCVASPLGT RVTVVEQGQA SYFYVASSLD
	AAVAASFSPR SVSIRRLKAD ASGFAPGFVA LSVLPKHLVS YSIEYVHSFH TGAFVYFLTV
	QPASVTDDPS ALHTRLARLS ATEPELGDYR ELVLDCRFAP
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	Made in Germany - from design to production - by highly experienced protein experts.
	Human MST1R Protein (raised in Insect Cells) purified by multi-step, protein-specific process
	to ensure crystallization grade.
	State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made to order protein and will be made for the first time for your order. Our

This protein is a made to order protein and will be made for the first time for your order. Our

All rights reserved.

	experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Three step purification of membrane proteins expressed in baculovirus infected SF9 insect
	cells:
	<ol> <li>Membrane proteins are fractioned by ultracentrifugation and subsequently solubilized with different detergents (detergent screen). Samples are analyzed by Western blot.</li> </ol>
	2. The best performing detergent is used for solubilization and the proteins are purified via their
	rho1D4 tag via two rho1D4 antibody columns: one DTT resistant, the other one not. Eluate
	fractions are analyzed by Western blot. 3. Protein containing fractions of the best purification are subjected to second purification step
	through size exclusion chromatograph. Eluate fractions are analyzed by SDS-PAGE and
	Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin-free.
Grade:	Crystallography grade
Torgot Details	
Target Details	
Target:	MST1R
Alternative Name:	MST1R (MST1R Products)

Target Details	
Background:	Receptor tyrosine kinase that transduces signals from the extracellular matrix into the
	cytoplasm by binding to MST1 ligand. Regulates many physiological processes including cell
	survival, migration and differentiation. Ligand binding at the cell surface induces
	autophosphorylation of RON on its intracellular domain that provides docking sites for
	downstream signaling molecules. Following activation by ligand, interacts with the PI3-kinase
	subunit PIK3R1, PLCG1 or the adapter GAB1. Recruitment of these downstream effectors by
	RON leads to the activation of several signaling cascades including the RAS-ERK, PI3 kinase-
	AKT, or PLCgamma-PKC. RON signaling activates the wound healing response by promoting
	epithelial cell migration, proliferation as well as survival at the wound site. Plays also a role in
	the innate immune response by regulating the migration and phagocytic activity of
	macrophages. Alternatively, RON can also promote signals such as cell migration and
	proliferation in response to growth factors other than MST1 ligand.

	EC0:0000269 PubMed:9764835}.
Molecular Weight:	30.9 kDa Including tag.
LIniProt <sup>.</sup>	00/012

Molecular weight.	SU.9 KDa Including tag.
UniProt:	Q04912
Pathways:	RTK Signaling

# Application Details

Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.

### Handling

Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)

### Images
