

# Datasheet for ABIN3115986 SIc26a9 Protein (AA 1-791) (Strep Tag)

Overview

Quantity:	250 µg
Target:	SIc26a9
Protein Characteristics:	AA 1-791
Origin:	Human
Source:	Cell-free protein synthesis (CFPS)
Protein Type:	Recombinant
Purification tag / Conjugate:	This Slc26a9 protein is labelled with Strep Tag.
Application:	ELISA, SDS-PAGE (SDS), Western Blotting (WB)

## Product Details

Brand:	AliCE®
Sequence:	MSQPRPRYVV DRAAYSLTLF DDEFEKKDRT YPVGEKLRNA FRCSSAKIKA VVFGLLPVLS

The proposed Strep-Tag is based on experience s with the expression system, a different complexity of the protein could make another tag necessary. In case you have a special request, please contact us.

#### Characteristics:

- Key Benefits:
- Made in Germany from design to production by highly experienced protein experts.
- Protein expressed with  $\mbox{ALiCE} \ensuremath{\textcircled{B}}$  and purified in one-step affinity chromatography
- These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed).
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

#### Expression System:

- ALICE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require posttranslational modifications.
- During lysate production, the cell wall and other cellular components that are not required for
  protein production are removed, leaving only the protein production machinery and the
  mitochondria to drive the reaction. During our lysate completion steps, the additional
  components needed for protein production (amino acids, cofactors, etc.) are added to
  produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

#### Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- The protein's absorbance will be measured against its specific reference buffer.
- We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.

Purification:

One-step Strep-tag purification of proteins expressed in Almost Living Cell-Free Expression System (AliCE®).

## Product Details

Purity:	> 70-80 % as determined by SDS PAGE, Western Blot and analytical SEC (HPLC).
Grade:	custom-made

## Target Details

Target:	Slc26a9
Alternative Name:	SLC26A9 (Slc26a9 Products)
Background:	Solute carrier family 26 member 9 (Anion transporter/exchanger protein 9),FUNCTION: Ion
	transporter that can act both as an ion channel and anion exchanger (PubMed:15800055,
	PubMed:17673510, PubMed:26801567, PubMed:32818062). Mainly acts as a chloride channel,
	which mediate uncoupled chloride anion transport in an alternate-access mechanism where a
	saturable binding site is alternately exposed to either one or the other side of the membrane
	(PubMed:17673510, PubMed:26801567, PubMed:32818062). Also acts as a DIDS- and
	thiosulfate- sensitive anion exchanger the exchange of chloride for bicarbonate ions across the
	cell membrane (PubMed:11834742, PubMed:15800055). {ECO:0000269 PubMed:11834742,
	EC0:0000269 PubMed:15800055, EC0:0000269 PubMed:17673510,
	EC0:0000269 PubMed:26801567, EC0:0000269 PubMed:32818062}.
Molecular Weight:	87.0 kDa
UniProt:	Q7LBE3

### Restrictions:

For Research Use only

# Handling

Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer. Standard Storage Buffer: PBS pH 7.4, 10 % Glycerol <b>Might differ depending on protein.</b>
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	12 months
