## Datasheet for ABIN3116820 SPPL2B Protein (AA 26-592) (rho-1D4 tag)

Overview

Quantity:	1 mg
Target:	SPPL2B
Protein Characteristics:	AA 26-592
Origin:	Human
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This SPPL2B protein is labelled with rho-1D4 tag.
Application:	Crystallization (Crys), ELISA, SDS-PAGE (SDS), Western Blotting (WB)

## Product Details

Sequence:	EYGMVHVVSQ AGGPEGKDYC ILYNPQWAHL PHDLSKASFL QLRNWTASLL CSAADLPARG
	FSNQIPLVAR GNCTFYEKVR LAQGSGARGL LIVSRERLVP PGGNKTQYDE IGIPVALLSY

<ul> <li>Characteristics:</li> <li>Made in Germany - from design to production</li> <li>Human SPPL2B Protein (raised in Insect Cells to ensure crystallization grade.</li> <li>State-of-the-art algorithm used for plasmid de This protein is a made to order protein and will b experts in the lab will ensure that you receive a compared of the second second</li></ul>	e) purified by multi-step, protein-specific process
experts in the lab will ensure that you receive a c	be made for the first time for your order. Our
	correctly folded protein.
The big advantage of ordering our made-to-orde	r proteins in comparison to ordering custom
made proteins from other companies is that the	re is no financial obligation in case the protein
cannot be expressed or purified.	
In the unlikely event that the protein cannot be e	xpressed or purified we do not charge anything
(other companies might charge you for any perfe	ormed steps in the expression process for
custom-made proteins, e.g. fees might apply for	the expression plasmid, the first expression
experiments or purification optimization).	
When you order this made-to-order protein you v	will only pay upon receival of the correctly
folded protein. With no financial risk on your end	l you can rest assured that our experienced
protein experts will do everything to make sure t	hat you receive the protein you ordered.
The concentration of our recombinant proteins i	s measured using the absorbance at 280nm.
The protein's absorbance will be measured in se	everal dilutions and is measured against its
specific reference buffer.	
The concentration of the protein is calculated us	sing its specific absorption coefficient. We use
the Expasy's protparam tool to determine the ab	osorption coefficient of each protein.
Purification: Three step purification of membrane proteins ex	pressed in baculovirus infected SF9 insect
cells:	
1. Membrane proteins are fractioned by ultracen different detergents (detergent screen). Samp	,
<ol> <li>The best performing detergent is used for soluring rho1D4 tag via two rho1D4 antibody columns: fractions are analyzed by Western blot.</li> </ol>	
3. Protein containing fractions of the best purific through size exclusion chromatograph. Eluate Western blot.	· · · ·
Purity: >95 % as determined by SDS PAGE, Size Exclusion	on Chromatography and Western Blot.
Sterility: 0.22 µm filtered	
Endotoxin Level: Protein is endotoxin-free.	
Grade: Crystallography grade

Target Details	
Target:	SPPL2B
Alternative Name:	SPPL2B (SPPL2B Products)
Background:	Intramembrane-cleaving aspartic protease (I-CLiP) that cleaves type II membrane signal peptides in the hydrophobic plane of the membrane. Functions in ITM2B and TNF processing
	<ul> <li>(PubMed:16829952, PubMed:16829951, PubMed:17965014, PubMed:19114711,</li> <li>PubMed:22194595). Catalyzes the intramembrane cleavage of the anchored fragment of shed TNF-alpha (TNF), which promotes the release of the intracellular domain (ICD) for signaling to the nucleus (PubMed:16829952, PubMed:16829951). May play a role in the regulation of innate and adaptive immunity (PubMed:16829952). Catalyzes the intramembrane cleavage of the simian foamy virus processed leader peptide gp18 of the envelope glycoprotein gp130 dependently of prior ectodomain shedding by furin or furin-like proprotein convertase (PC)- mediated cleavage proteolysis (PubMed:23132852). {ECO:0000269 PubMed:16829951, ECO:0000269 PubMed:16829952, ECO:0000269 PubMed:17965014, ECO:0000269 PubMed:19114711, ECO:0000269 PubMed:22194595, ECO:0000269 PubMed:23132852}.</li> </ul>
Molecular Weight:	63.4 kDa Including tag.
UniProt: Application Details	Q8TCT7
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.

## Handling

Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
