Datasheet for ABIN3117504 SLITRK1 Protein (AA 18-696) (rho-1D4 tag)

Overview

Quantity:	1 mg
Target:	SLITRK1
Protein Characteristics:	AA 18-696
Origin:	Human
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This SLITRK1 protein is labelled with rho-1D4 tag.
Application:	Crystallization (Crys), ELISA, SDS-PAGE (SDS), Western Blotting (WB)

Product Details

Sequence:	NVTGDVCKEK ICSCNEIEGD LHVDCEKKGF TSLQRFTAPT SQFYHLFLHG NSLTRLFPNE

special request, please contact us. Characteristics: • Made in Cermany - from design to production - by highly experienced protein experts. • Human SUTRCI Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade. • State-of-the-art algorithm used for plasmid design (Gene synthesis). This protein is a made to order protein and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein. The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified. In the unlikely event that the protein cannot be expression process for custom-made proteins, or purification optimization). When you order this made-to-order protein you will only pay upon receival of the correctly folded protein. With no financial risk on your end you can rest assured that our experiments appendix will do everything to make sure that you receive the protein you ordered. The concentration of our recombinant proteins is measured using the absorbance at 280nm. The protein's absorbance will be measured using its specific absorption coefficient. We use the Expersys protparam tool to determine the absorption coefficient. We use the Expersys protparam tool to determine the absorption coefficient we use the Expersys protparam tool to determine the absorption coefficient of each protein. Purification: The concentration of membrane proteins expressed in baculovirus infected SF9 linsect cells: </th <th></th> <th>Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a</th>		Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a

Product Details	
Endotoxin Level:	Protein is endotoxin-free.
Grade:	Crystallography grade

Target Details

Target:	SLITRK1
Alternative Name:	SLITRK1 (SLITRK1 Products)
Background:	Enhances neuronal dendrite outgrowth. {ECO:0000269 PubMed:16224024}.
Molecular Weight:	77.0 kDa Including tag.
UniProt:	Q96PX8
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.

Expiry Date: Unlimited (if stored properly)
