## Datasheet for ABIN3117765 DERL1 Protein (AA 2-251) (rho-1D4 tag)

Image

0.01.000	
Quantity:	1 mg
Target:	DERL1
Protein Characteristics:	AA 2-251
Origin:	Human
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This DERL1 protein is labelled with rho-1D4 tag.
Application:	ELISA, Western Blotting (WB), Crystallization (Crys), SDS-PAGE (SDS)
Product Details	
Sequence:	SDIGDWFRSI PAITRYWFAA TVAVPLVGKL GLISPAYLFL WPEAFLYRFQ IWRPITATFY
	FPVGPGTGFL YLVNLYFLYQ YSTRLETGAF DGRPADYLFM LLFNWICIVI TGLAMDMQLL
	MIPLIMSVLY VWAQLNRDMI VSFWFGTRFK ACYLPWVILG FNYIIGGSVI NELIGNLVGH
	LYFFLMFRYP MDLGGRNFLS TPQFLYRWLP SRRGGVSGFG VPPASMRRAA DQNGGGGRHN
	WGQGFRLGDQ
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	Made in Germany - from design to production - by highly experienced protein experts.
	Human DERL1 Protein (raised in Insect Cells) purified by multi-step, protein-specific process
	to ensure crystallization grade.
	State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made to order protein and will be made for the first time for your order. Our

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 1/4 | Product datasheet for ABIN3117765 | 09/11/2023 | Copyright antibodies-online. All rights reserved.

	experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Three step purification of membrane proteins expressed in baculovirus infected SF9 insect
	cells:
	1. Membrane proteins are fractioned by ultracentrifugation and subsequently solubilized with different detergents (detergent screen). Samples are analyzed by Western blot.
	2. The best performing detergent is used for solubilization and the proteins are purified via their
	rho1D4 tag via two rho1D4 antibody columns: one DTT resistant, the other one not. Eluate
	fractions are analyzed by Western blot. 3. Protein containing fractions of the best purification are subjected to second purification step
	through size exclusion chromatograph. Eluate fractions are analyzed by SDS-PAGE and
	Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin-free.
Grade:	Crystallography grade
Target Details	
Target:	DERL1
Alternative Name:	DERL1 (DERL1 Products)

## Target Details

Background:	Functional component of endoplasmic reticulum-associated degradation (ERAD) for misfolded lumenal proteins. May act by forming a channel that allows the retrotranslocation of misfolded
	proteins into the cytosol where they are ubiquitinated and degraded by the proteasome. May
	mediate the interaction between VCP and the degradation substrate. In case of infection by
	cytomegaloviruses, it plays a central role in the export from the ER and subsequent degradation
	of MHC class I heavy chains via its interaction with US11 viral protein, which recognizes and
	associates with MHC class I heavy chains. Also participates in the degradation process of
	misfolded cytomegalovirus US2 protein. {ECO:0000269 PubMed:15215855,
	ECO:0000269 PubMed:15215856}.
Molecular Weight:	29.8 kDa Including tag.
UniProt:	Q9BUN8
Pathways:	ER-Nucleus Signaling
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee
	though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be
	insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to
	increase solubility. We will discuss all possible options with you in detail to assure that you
	receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
