## Datasheet for ABIN3117768 APOO Protein (AA 26-198) (rho-1D4 tag)

Overview	
Quantity:	1 mg
Target:	APOO
Protein Characteristics:	AA 26-198
Origin:	Human
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This APOO protein is labelled with rho-1D4 tag.
Application:	SDS-PAGE (SDS), Western Blotting (WB), Crystallization (Crys), ELISA
Product Details	
Product Details	
Sequence:	KKDSPPKNSV KVDELSLYSV PEGQSKYVEE ARSQLEESIS QLRHYCEPYT TWCQETYSQT
	KPKMQSLVQW GLDSYDYLQN APPGFFPRLG VIGFAGLIGL LLARGSKIKK LVYPPGFMGL
	AASLYYPQQA IVFAQVSGER LYDWGLRGYI VIEDLWKENF QKPGNVKNSP GTK
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	<ul> <li>Made in Germany - from design to production - by highly experienced protein experts.</li> <li>Human APOO Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade.</li> <li>State-of-the-art algorithm used for plasmid design (Gene synthesis).</li> </ul>
	This protein is a made to order protein and will be made for the first time for your order. Our
	experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom

	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Three step purification of membrane proteins expressed in baculovirus infected SF9 insect cells:
	1. Membrane proteins are fractioned by ultracentrifugation and subsequently solubilized with different detergents (detergent screen). Samples are analyzed by Western blot.
	<ol> <li>The best performing detergent is used for solubilization and the proteins are purified via the rho1D4 tag via two rho1D4 antibody columns: one DTT resistant, the other one not. Eluate fractions are analyzed by Western blot.</li> </ol>
	<ol> <li>Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatograph. Eluate fractions are analyzed by SDS-PAGE and Western blot.</li> </ol>
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin-free.
Grade:	Crystallography grade
Target Details	
Target:	APOO
Alternative Name:	AP00 (AP00 Products)
Background:	Component of the MICOS complex, a large protein complex of the mitochondrial inner
	membrane that plays crucial roles in the maintenance of crista junctions, inner membrane

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 2/3 | Product datasheet for ABIN3117768 | 04/30/2024 | Copyright antibodies-online. ## Target Details

	architecture, and formation of contact sites to the outer membrane. Plays a crucial role in crista
	junction formation and mitochondrial function (PubMed:25764979). Can promote cardiac
	lipotoxicity by enhancing mitochondrial respiration and fatty acid metabolism in cardiac
	myoblasts (PubMed:24743151). Promotes cholesterol efflux from macrophage cells. Detected
	in HDL, LDL and VLDL. Secreted by a microsomal triglyceride transfer protein (MTTP)-
	dependent mechanism, probably as a VLDL-associated protein that is subsequently transferred
	to HDL (PubMed:16956892). {ECO:0000269 PubMed:16956892,
	ECO:0000269 PubMed:24743151, ECO:0000269 PubMed:25764979}.
Molecular Weight:	20.8 kDa Including tag.
UniProt:	Q9BUR5
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee
	though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be
	insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to
	increase solubility. We will discuss all possible options with you in detail to assure that you
	receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
