

Datasheet for ABIN3117983 ChT Protein (AA 1-580) (Strep Tag)

Overview

Quantity:	250 μg
Target:	ChT
Protein Characteristics:	AA 1-580
Origin:	Human
Source:	Cell-free protein synthesis (CFPS)
Protein Type:	Recombinant
Purification tag / Conjugate:	This ChT protein is labelled with Strep Tag.
Application:	SDS-PAGE (SDS), Western Blotting (WB), ELISA

Product Details

Brand:	AliCE®
Sequence:	MAFHVEGLIA IIVFYLLILL VGIWAAWRTK NSGSAEERSE AIIVGGRDIG LLVGGFTMTA
	TWVGGGYING TAEAVYVPGY GLAWAQAPIG YSLSLILGGL FFAKPMRSKG YVTMLDPFQQ

	system, a different complexity of the protein could make another tag necessary. In case you
	have a special request, please contact us.
Characteristics:	Key Benefits:
	 Made in Germany - from design to production - by highly experienced protein experts. Protein expressed with ALiCE® and purified in one-step affinity chromatography These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed). State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made-to-order protein and will be made for the first time for your order. Our
	experts in the lab try to ensure that you receive soluble protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	Expression System:
	 ALICE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require post-translational modifications. During lysate production, the cell wall and other cellular components that are not required fo protein production are removed, leaving only the protein production machinery and the mitochondria to drive the reaction. During our lysate completion steps, the additional components needed for protein production (amino acids, cofactors, etc.) are added to produce something that functions like a cell, but without the constraints of a living system - all that's needed is the DNA that codes for the desired protein!
	Concentration:
	 The concentration of our recombinant proteins is measured using the absorbance at 280nm The protein's absorbance will be measured against its specific reference buffer. We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.
Purification:	One-step Strep-tag purification of proteins expressed in Almost Living Cell-Free Expression System (AliCE®).
Purity:	> 70-80 % as determined by SDS PAGE, Western Blot and analytical SEC (HPLC).

Grade:

custom-made

Target Details

Target:	ChT
Alternative Name:	SLC5A7 (ChT Products)
Background:	High affinity choline transporter 1 (hCHT1) (Hemicholinium-3-sensitive choline transporter)
	(CHT) (Solute carrier family 5 member 7),FUNCTION: High-affinity Na(+)-coupled choline
	transmembrane symporter (PubMed:11027560, PubMed:11068039, PubMed:12969261,
	PubMed:17005849, PubMed:23141292, PubMed:23132865, PubMed:12237312,
	PubMed:27569547). Functions as an electrogenic, voltage-dependent transporter with variable
	charge/choline stoichiometry (PubMed:17005849). Choline uptake and choline-induced curren
	is also Cl(-)-dependent where Cl(-) is likely a regulatory ion rather than cotransported ion
	(PubMed:11068039, PubMed:17005849, PubMed:12237312). Plays a critical role in
	acetylcholine (ACh) synthesis by taking up the substrate choline from the synaptic cleft into the
	presynaptic nerve terminals after neurotransmitter release (PubMed:27569547).
	SLC5A7/CHT1-mediated choline high-affinity transport in cholinergic neurons is the rate-
	limiting step for production of ACh, thereby facilitating communication by subsequent action
	potentials (PubMed:11027560). Localized predominantly in presynaptic terminal intracellular
	organelles, and translocated to the plasma membrane in active form in response to neuronal
	activity (PubMed:12969261, PubMed:15953352). {ECO:0000269 PubMed:11027560,
	ECO:0000269 PubMed:11068039, ECO:0000269 PubMed:12237312,

	ECO:0000269 PubMed:23141292, ECO:0000269 PubMed:27569547}.
Molecular Weight:	63.2 kDa
UniProt:	Q9GZV3
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a
	guarantee though.

Restrictions:	For Research Use only	
Handling		
Format:	Liquid	
Buffer:	The buffer composition is at the discretion of the manufacturer. Standard Storage Buffer: PBS pH 7.4, 10 % Glycerol Might differ depending on protein.	
Handling Advice:	Avoid repeated freeze-thaw cycles.	
Storage:	-80 °C	
Storage Comment:	Store at -80°C.	
Expiry Date:	12 months
