Our experts in the lab try to ensure that you receive soluble protein.</p><p>The big advantage of ordering our <b>made-to-order proteins</b> in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.</p><div>Expression System:</div><ul style="list-style-type: none"><li>• ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from <i>Nicotiana tabacum</i> c.v.. Purification:	One-step Strep-tag purification of proteins expressed in Almost Living Cell-Free Expression System (ALiCE®).
Purity:	> 70-80 % as determined by SDS PAGE, Western Blot and analytical SEC (HPLC).
Grade:	custom-made

## Target Details

Target:	KCNS2
Alternative Name:	KCNS2 ( <a href="#">KCNS2 Products</a> )
Background:	<p>Potassium voltage-gated channel subfamily S member 2 (Delayed-rectifier K(+)) channel alpha subunit 2 (Voltage-gated potassium channel subunit Kv9.2),FUNCTION: Potassium channel subunit that does not form functional channels by itself. Can form functional heterotetrameric channels with KCNB1 and KCNB2, modulates the delayed rectifier voltage-gated potassium channel activation and deactivation rates of KCNB1 and KCNB2.</p> <p>{ECO:0000250 UniProtKB:O35174}.</p>
Molecular Weight:	54.2 kDa
UniProt:	<a href="#">Q9ULS6</a>

## Application Details

Application Notes:	<p>In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.</p>
