

## Datasheet for ABIN3119520 NPFFR2 Protein (AA 1-522) (Strep Tag)

Overview

Quantity:	250 µg
Target:	NPFFR2 (NPFF2)
Protein Characteristics:	AA 1-522
Origin:	Human
Source:	Cell-free protein synthesis (CFPS)
Protein Type:	Recombinant
Purification tag / Conjugate:	This NPFFR2 protein is labelled with Strep Tag.
Application:	SDS-PAGE (SDS), ELISA, Western Blotting (WB)

## Product Details

Brand:	AliCE®
Sequence:	MNSFFGTPAA SWCLLESDVS SAPDKEAGRE RRALSVQQRG GPAWSGSLEW SRQSAGDRRR
	LGLSRQTAKS SWSRSRDRTC CCRRAWWILV PAADRARRER FIMNEKWDTN SSENWHPIWN
	VNDTKHHLYS DINITYVNYY LHQPQVAAIF IISYFLIFFL CMMGNTVVCF IVMRNKHMHT
	VTNLFILNLA ISDLLVGIFC MPITLLDNII AGWPFGNTMC KISGLVQGIS VAASVFTLVA
	IAVDRFQCVV YPFKPKLTIK TAFVIIMIIW VLAITIMSPS AVMLHVQEEK YYRVRLNSQN
	KTSPVYWCRE DWPNQEMRKI YTTVLFANIY LAPLSLIVIM YGRIGISLFR AAVPHTGRKN
	QEQWHVVSRK KQKIIKMLLI VALLFILSWL PLWTLMMLSD YADLSPNELQ IINIYIYPFA
	HWLAFGNSSV NPIIYGFFNE NFRRGFQEAF QLQLCQKRAK PMEAYALKAK SHVLINTSNQ
	LVQESTFQNP HGETLLYRKS AEKPQQELVM EELKETTNSS EI
	Sequence without tag. The proposed Strep-Tag is based on experience s with the expression
	system, a different complexity of the protein could make another tag necessary. In case you

	have a special request, please contact us.
Characteristics:	Key Benefits:
	<ul> <li>Made in Germany - from design to production - by highly experienced protein experts.</li> <li>Protein expressed with ALiCE® and purified in one-step affinity chromatography</li> <li>These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed).</li> <li>State-of-the-art algorithm used for plasmid design (Gene synthesis).</li> </ul>
	This protein is a <b>made-to-order protein</b> and will be made for the first time for your order. Our
	experts in the lab try to ensure that you receive soluble protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.
	Expression System:
	<ul> <li>ALICE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require post-translational modifications.</li> <li>During lysate production, the cell wall and other cellular components that are not required for protein production are removed, leaving only the protein production machinery and the mitochondria to drive the reaction. During our lysate completion steps, the additional components needed for protein production (amino acids, cofactors, etc.) are added to produce something that functions like a cell, but without the constraints of a living system - all that's needed is the DNA that codes for the desired protein!</li> </ul>
	Concentration:
	<ul> <li>The concentration of our recombinant proteins is measured using the absorbance at 280nm</li> <li>The protein's absorbance will be measured against its specific reference buffer.</li> <li>We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.</li> </ul>
Purification:	One-step Strep-tag purification of proteins expressed in Almost Living Cell-Free Expression System (AliCE®).
Purity:	> 70-80 % as determined by SDS PAGE, Western Blot and analytical SEC (HPLC).
Grade:	custom-made

Target:	NPFFR2 (NPFF2)
Alternative Name:	NPFFR2 (NPFF2 Products)
Background:	Neuropeptide FF receptor 2 (G-protein coupled receptor 74) (G-protein coupled receptor
	HLWAR77) (Neuropeptide G-protein coupled receptor),FUNCTION: Receptor for NPAF (A-18-F-
	amide) and NPFF (F-8-F-amide) neuropeptides, also known as morphine-modulating peptides.
	Can also be activated by a variety of naturally occurring or synthetic FMRF-amide like ligands.
	This receptor mediates its action by association with G proteins that activate a
	phosphatidylinositol-calcium second messenger system.
Molecular Weight:	60.3 kDa
UniProt:	Q9Y5X5
Pathways:	cAMP Metabolic Process
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a
	guarantee though.
Comment:	ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from
	Nicotiana tabacum c.v This contains all the protein expression machinery needed to produce
	even the most difficult-to-express proteins, including those that require post-translational modifications.
	During lysate production, the cell wall and other cellular components that are not required for
	protein production are removed, leaving only the protein production machinery and the
	mitochondria to drive the reaction. During our lysate completion steps, the additional
	components needed for protein production (amino acids, cofactors, etc.) are added to produce
	something that functions like a cell, but without the constraints of a living system - all that's
	needed is the DNA that codes for the desired protein!
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer.
	Standard Storage Buffer: PBS pH 7.4, 10 % Glycerol Might differ depending on protein.

## Handling

Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	12 months
