Datasheet for ABIN3119989 INSRR Protein (AA 747-1300) (rho-1D4 tag)

-online.com antibodies

Overview

Quantity:	1 mg
Target:	INSRR
Protein Characteristics:	AA 747-1300
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This INSRR protein is labelled with rho-1D4 tag.
Application:	Western Blotting (WB), SDS-PAGE (SDS), ELISA, Crystallization (Crys)

## Product Details

Sequence:	EAGLLRLGKN NSDFEIQEDK VPRERAILSG LRHFTEYRID IHACNHAAHT VGCSAATFVF
	ARTMPHREAD GIPGKVAWKA AGKSSVTLHW LEPPDPNGLI LKYEIKYRRL GEEATVLCVS
	RLRYAKVGGV HLALLPPGNY SAKVRATSLA GNGSWTDGVT FYITDLEEED TGGMRIFLTV
	TPVGFMLLVT LAALGFFYSR KRNSTLYTSV NPEYFSASHM YVPDEWEVPR EQIAIIRELG
	QGSFGMVYEG LARGLEAGEE STPVALKTVN ELASARERVE FLKEASVMKA FKCHHVVRLL
	GVVSQGQPTL VIMELMTRGD LKSHLRSLRP EAENNPGLPQ PALSDMIQMA GEIADGMAYL
	AAKKFVHRDL AARNCMVSQD FTVKIGDFGM TRDVYETDYY RKGGKGLLPV RWMAPESLKD
	GIFTTHSDVW SFGVVLWEIV TLAEQPYQGL SNEQVLKFVM DGGVLEELEN CPIQLQELMR
	LCWQHSPRLR PTFVHILDRI QDELRPSFRL CSFYYSPECQ RGQASLLPTE AEPDSPPTLN
	GASDYSAPNG GPGH
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.

Product Details	
Characteristics:	<ul> <li>Made in Germany - from design to production - by highly experienced protein experts.</li> <li>Mouse Insrr Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade.</li> <li>State-of-the-art algorithm used for plasmid design (Gene synthesis).</li> </ul>
	This protein is a made to order protein and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Three step purification of membrane proteins expressed in baculovirus infected SF9 insect cells:
	1. Membrane proteins are fractioned by ultracentrifugation and subsequently solubilized with different detergents (detergent screen). Samples are analyzed by Western blot.
	2. The best performing detergent is used for solubilization and the proteins are purified via their rho1D4 tag via two rho1D4 antibody columns: one DTT resistant, the other one not. Eluate fractions are applyzed by Western blot
	fractions are analyzed by Western blot. 3. Protein containing fractions of the best purification are subjected to second purification step
	through size exclusion chromatograph. Eluate fractions are analyzed by SDS-PAGE and Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin-free.
Grade:	Crystallography grade

Target Details	
Target:	INSRR
Alternative Name:	Insrr (INSRR Products)
Background:	Receptor with tyrosine-protein kinase activity. Functions as a pH sensing receptor which is activated by increased extracellular pH . Activates an intracellular signaling pathway that involves IRS1 and AKT1/PKB. {ECO:0000269 PubMed:21641549}.
Molecular Weight:	62.9 kDa Including tag.
UniProt:	Q9WTL4
Pathways:	RTK Signaling
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C

Expiry Date: Unlimited (if stored properly)

Storage Comment:

Store at -80°C.
