# Datasheet for ABIN3120194 GNAS Protein (AA 47-257) (His tag)

Image

#### Overview

| Quantity:                     | 1 mg   |
|-------------------------------|--|
| Target:                       | GNAS   |
| Protein Characteristics:      | AA 47-257  |
| Origin:                       | Mouse  |
| Source:                       | Insect Cells   |
| Protein Type:                 | Recombinant  |
| Purification tag / Conjugate: | This GNAS protein is labelled with His tag.                          |
| Application:                  | ELISA, Western Blotting (WB), Crystallization (Crys), SDS-PAGE (SDS) |
| Product Details               |  |

| Sequence:        | SSNARAQQRA AQRRSFLNAH HRSAAAAAA QVLPESSESE SDHEHEEVEP ELARPECLEY  |
|------------------|---|
|                  | DQDDYETETD SETEPESDIE SETEIETEPE TEPETAPTTE PETEPEDERG PRGATFNQSL   |
|                  | TQRLHALKLQ SADASPRRAQ PTTQEPESAS EGEEPQRGPL DQDPRDPEEE PEERKEENRQ   |
|                  | PRRCKTRRPA RRRDQSPESP PRKGPIPIRR H  |
|                  | Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a  |
|                  | special request, please contact us.   |
| Characteristics: |   |
| Characteristics: | Made in Germany - from design to production - by highly experienced protein experts.  |
| Characteristics: | <ul> <li>Made in Germany - from design to production - by highly experienced protein experts.</li> <li>Mouse Gnas Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade.</li> </ul> |

|                   | The big advantage of ordering our made-to-order proteins in comparison to ordering custom  |
|-------------------|--|
|                   | made proteins from other companies is that there is no financial obligation in case the protein  |
|                   | cannot be expressed or purified.   |
|                   | In the unlikely event that the protein cannot be expressed or purified we do not charge anything   |
|                   | (other companies might charge you for any performed steps in the expression process for  |
|                   | custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression   |
|                   | experiments or purification optimization).   |
|                   | When you order this made-to-order protein you will only pay upon receival of the correctly   |
|                   | folded protein. With no financial risk on your end you can rest assured that our experienced   |
|                   | protein experts will do everything to make sure that you receive the protein you ordered.  |
|                   | The concentration of our recombinant proteins is measured using the absorbance at 280nm.   |
|                   | The protein's absorbance will be measured in several dilutions and is measured against its   |
|                   | specific reference buffer.   |
|                   | The concentration of the protein is calculated using its specific absorption coefficient. We use   |
|                   | the Expasy's protparam tool to determine the absorption coefficient of each protein.   |
| Purification:     | Two step purification of proteins expressed in baculovirus infected SF9 insect cells:  |
|                   | 1. In a first purification step, the protein is purified from the cleared cell lysate using three  |
|                   | different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate  |
|                   | fractions are analyzed by SDS-PAGE.  |
|                   | <ol> <li>Protein containing fractions of the best purification are subjected to second purification step<br/>through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and<br/>Western blot.</li> </ol> |
| Purity:           | >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.   |
| Sterility:        | 0.22 µm filtered   |
| Endotoxin Level:  | Protein is endotoxin free.   |
| Grade:            | Crystallography grade  |
| Target Details    |  |
| Target:           | GNAS   |
| Alternative Name: | Gnas (GNAS Products)   |
| Molecular Weight: | 24.9 kDa Including tag.  |
|                   |  |

UniProt:

Pathways:

Thyroid Hormone Synthesis, cAMP Metabolic Process, Myometrial Relaxation and Contraction,

#### Embryonic Body Morphogenesis

## Application Details

| Application Notes: | In addition to the applications listed above we expect the protein to work for functional studies |
|--------------------|---|
|                    | as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee |
|                    | though.   |
| Comment:           | Protein has not been tested for activity yet. In cases in which it is highly likely that the      |
|                    | recombinant protein with the default tag will be insoluble our protein lab may suggest a higher   |
|                    | molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible  |
|                    | options with you in detail to assure that you receive your protein of interest.                   |
| Restrictions:      | For Research Use only   |
| Handling           |   |
| Format:            | Liquid  |
| Buffer:            | 100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.        |
| Handling Advice:   | Avoid repeated freeze-thaw cycles.  |
| Storage:           | -80 °C  |
| Storage Comment:   | Store at -80°C.   |
| Expiry Date:       | Unlimited (if stored properly)  |
