## Datasheet for ABIN3120249 NGFR Protein (AA 22-417) (rho-1D4 tag)

Overview

Image

Quantity:	1 mg
	· ···9
Target:	NGFR
Protein Characteristics:	AA 22-417
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This NGFR protein is labelled with rho-1D4 tag.
Application:	ELISA, Western Blotting (WB), SDS-PAGE (SDS), Crystallization (Crys)

## Product Details

Sequence:	KETCSTGMYT HSGECCKACN LGEGVAQPCG ANQTVCEPCL DSVTFSDVVS ATEPCKPCTE	
	CLGLQSMSAP CVEADDAVCR CSYGYYQDEE TGRCEACSVC GVGSGLVFSC QDKQNTVCEE	
	CPEGTYSDEA NHVDPCLPCT VCEDTERQLR ECTPWADAEC EEIPGRWITR STPPEGSDVT	
	TPSTQEPEAP PERDLIASTV ADTVTTVMGS SQPVVTRGTA DNLIPVYCSI LAAVVVGLVA	
	YIAFKRWNSC KQNKQGANSR PVNQTPPPEG EKLHSDSGIS VDSQSLHDQQ THTQTASAQA	
	LKGDGNLYSS LPLTKREEVE KLLNGDTWRH LAGELGYQPE HIDSFTHEAC PVRALLASWG	
	AQDSATLDAL LAALRRIQRA DIVESLCSES TATSPV	
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a	
	special request, please contact us.	
Characteristics:	<ul> <li>Made in Germany - from design to production - by highly experienced protein experts.</li> <li>Mouse Ngfr Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade.</li> </ul>

	State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made to order protein and will be made for the first time for your order. Our
	experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Three step purification of membrane proteins expressed in baculovirus infected SF9 insect
	cells:
	<ol> <li>Membrane proteins are fractioned by ultracentrifugation and subsequently solubilized with different detergents (detergent screen). Samples are analyzed by Western blot.</li> </ol>
	2. The best performing detergent is used for solubilization and the proteins are purified via their
	rho1D4 tag via two rho1D4 antibody columns: one DTT resistant, the other one not. Eluate
	fractions are analyzed by Western blot. 3. Protein containing fractions of the best purification are subjected to second purification step
	through size exclusion chromatograph. Eluate fractions are analyzed by SDS-PAGE and Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin-free.
Grade:	Crystallography grade

## Target Details

Target:	NGFR	
Alternative Name:	Ngfr (NGFR Products)	
Background:	Low affinity receptor which can bind to NGF, BDNF, NT-3, and NT-4. Can mediate cell survival	
	as well as cell death of neural cells (By similarity). Plays a role in the regulation of the	
	translocation of GLUT4 to the cell surface in adipocytes and skeletal muscle cells in response	
	to insulin, probably by regulating RAB31 activity, and thereby contributes to the regulation of	
	insulin-dependent glucose uptake. Binds to rabies virus glycoprotein Gs. Necessary for the	
	circadian oscillation of the clock genes ARNTL/BMAL1, PER1, PER2 and NR1D1 in the	
	suprachiasmatic nucleus (SCN) of the brain and in liver and of the genes involved in glucose	
	and lipid metabolism in the liver. {ECO:0000250, ECO:0000269 PubMed:22460790,	
	ECO:0000269 PubMed:23785138}.	
Molecular Weight:	43.6 kDa Including tag.	
UniProt:	Q9Z0W1	
Pathways:	NF-kappaB Signaling, Neurotrophin Signaling Pathway, Carbohydrate Homeostasis, Growth	
	Factor Binding	
Application Details		
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies	
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee	
	though.	
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the	
	recombinant protein with the default tag will be insoluble our protein lab may suggest a higher	
	molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible	
	options with you in detail to assure that you receive your protein of interest.	
Restrictions:	For Research Use only	
Handling		
Format:	Liquid	
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.	
	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer. Avoid repeated freeze-thaw cycles.
