

## Datasheet for ABIN3120619 NUP43 Protein (AA 1-380) (Strep Tag)

Overview

Quantity:	1 mg
Target:	NUP43
Protein Characteristics:	AA 1-380
Origin:	Mouse
Source:	Cell-free protein synthesis (CFPS)
Protein Type:	Recombinant
Purification tag / Conjugate:	This NUP43 protein is labelled with Strep Tag.
Application:	ELISA, Western Blotting (WB), SDS-PAGE (SDS)

## Product Details

Brand:	AliCE®	
Sequence:	MEEIYAKFVS QKISKTRWRP VPSGSLQTTE TFATGSWDNE ENCVSLWSIG DFGNLDSDGG	
	FEGDHQLLCD IRHHGDVMDL QFFDQERIVA ASSTGCVTVF LHHPNNQTLS VNQQWPAAHY	
	HTGPSSPSYS SAPCTGIVCD NPEIVTVGED GRINLFRVDH KEAVRTIDNA DSSTLHAVTF	
	LRTPEIVTVN SIGQLKIWDF RQQGSEPCQI LSLTGDRVPL HCVDRHPDQQ HVVATGGQDG	
	MLSIWDVRQG TMPVSLLKAH EAEMWEVHFH PSNPDHLFTC SEDGSLWHWD ASTDAPEKSS	
	LFHQGGRSST FLSHSLSNQA GVHQSLVSSW LSTDPAKDRI EITSLLPSRT LSVNSLDVLG	
	PCLVCGTDAE AIYVTRQLFS	
	Sequence without tag. The proposed Strep-Tag is based on experience s with the expression	
	system, a different complexity of the protein could make another tag necessary. In case you	
	have a special request, please contact us.	
Characteristics:	Key Benefits:

- Made in Germany from design to production by highly experienced protein experts.
- · Protein expressed with ALiCE® and purified in one-step affinity chromatography
- These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed).
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

## Expression System:

- ALICE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require posttranslational modifications.
- During lysate production, the cell wall and other cellular components that are not required for
  protein production are removed, leaving only the protein production machinery and the
  mitochondria to drive the reaction. During our lysate completion steps, the additional
  components needed for protein production (amino acids, cofactors, etc.) are added to
  produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

## Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- The protein's absorbance will be measured against its specific reference buffer.
- We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.

Purification:	One-step Strep-tag purification of proteins expressed in Almost Living Cell-Free Expression System (AliCE®).
Purity:	> 70-80 % as determined by SDS PAGE, Western Blot and analytical SEC (HPLC).
Grade:	custom-made
Target Details	
Target:	NUP43

Alternative Name:	Nup43 (NUP43 Products)	
Background:	Nucleoporin Nup43 (Nup107-160 subcomplex subunit Nup43),FUNCTION: Component of the	
	Nup107-160 subcomplex of the nuclear pore complex (NPC). The Nup107-160 subcomplex is	
	required for the assembly of a functional NPC. The Nup107-160 subcomplex is also required for	
	normal kinetochore microtubule attachment, mitotic progression and chromosome segregatio	
	(By similarity). {ECO:0000250}.	
Molecular Weight:	42.0 kDa	
UniProt:	P59235	
Application Details		
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies	
	as well. As the protein has not been tested for functional studies yet we cannot offer a	
	guarantee though.	
Comment:	ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from	
	Nicotiana tabacum c.v This contains all the protein expression machinery needed to produce	
	even the most difficult-to-express proteins, including those that require post-translational	
	modifications.	
	During lysate production, the cell wall and other cellular components that are not required for	
	protein production are removed, leaving only the protein production machinery and the	
	mitochondria to drive the reaction. During our lysate completion steps, the additional	
	components needed for protein production (amino acids, cofactors, etc.) are added to produce	
	something that functions like a cell, but without the constraints of a living system - all that's	
	needed is the DNA that codes for the desired protein!	
Restrictions:	For Research Use only	
Handling		
<sup>=</sup> ormat:	Liquid	
Buffer:	The buffer composition is at the discretion of the manufacturer.	
	Standard Storage Buffer: PBS pH 7.4, 10 % Glycerol Might differ depending on protein.	
Handling Advice:	Avoid repeated freeze-thaw cycles.	
Storage:	-80 °C	
Storage Comment:	Store at -80°C.
