# Datasheet for ABIN3120675 SHFM1 Protein (AA 1-70) (His tag)

Image

#### Overview

Quantity:	1 mg
Target:	SHFM1
Protein Characteristics:	AA 1-70
Origin:	Mouse
Source:	Escherichia coli (E. coli)
Protein Type:	Recombinant
Purification tag / Conjugate:	This SHFM1 protein is labelled with His tag.
Application:	ELISA, Western Blotting (WB), SDS-PAGE (SDS), Crystallization (Crys)
Product Details	
Sequence:	MSEKKQPVDL GLLEEDDEFE EFPAEDWAGL DEDEDAHVWE DNWDDDNVED DFSNQLRAEL
	EKHGYKMETS
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	<ul> <li>Special request, please contact us.</li> <li>Made in Germany - from design to production - by highly experienced protein experts.</li> </ul>
Characteristics:	
Characteristics:	<ul> <li>Made in Germany - from design to production - by highly experienced protein experts.</li> <li>Mouse Shfm1 Protein (raised in E. Coli) purified by multi-step, protein-specific process to ensure crystallization grade.</li> </ul>

Product Details	
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in bacterial culture:
	1. In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate
	fractions are analyzed by SDS-PAGE. 2. Protein containing fractions of the best purification are subjected to second purification step
	through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Endotoxin has not been removed. Please contact us if you require endotoxin removal.
Grade:	Crystallography grade

### Target Details

Target:	SHFM1
Alternative Name:	Shfm1 (SHFM1 Products)
Background:	Subunit of the 26S proteasome which plays a role in ubiquitin-dependent proteolysis. Prevents
	accumulation of R-loops independently of the RAD51 homologous recombination function (By
	similarity). Component of the TREX-2 complex (transcription and export complex 2), composed
	of at least ENY2, GANP, PCID2, DSS1, and either centrin CETN2 or CETN3. The TREX-2 complex
	functions in docking export-competent ribonucleoprotein particles (mRNPs) to the nuclear

## Target Details

	entrance of the nuclear pore complex (nuclear basket). TREX-2 participates in mRNA export
	and accurate chromatin positioning in the nucleus by tethering genes to the nuclear periphery.
	Binds and stabilizes BRCA2 and is thus involved in the control of R-loop-associated DNA
	damage and thus transcription-associated genomic instability. R-loop accumulation increases
	in DSS1-depleted cells. {ECO:0000250, ECO:0000250 UniProtKB:P60896}.
Molecular Weight:	9.2 kDa Including tag.
UniProt:	P60897
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee
	though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the
	recombinant protein with the default tag will be insoluble our protein lab may suggest a higher
	molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible
	options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
01	

Expiry Date: Unlimited (if stored properly)

Store at -80°C.

Storage Comment:

**Image 1.** "Crystallography Grade" protein due to multi-step, protein-specific purification process
