# **SNRPE Protein (AA 1-92) (His tag)**

Image

$\sim$					
()	VE	۲۱	/1	$\triangle$	Λ

Quantity:	1 mg		
Target:	SNRPE		
Protein Characteristics:	AA 1-92		
Origin:	Mouse		
Source:	Escherichia coli (E. coli)		
Protein Type:	Recombinant		
Purification tag / Conjugate:	This SNRPE protein is labelled with His tag.		
Application:	ELISA, Western Blotting (WB), SDS-PAGE (SDS), Crystallization (Crys)		
Product Details			
Sequence:	MAYRGQGQKV QKVMVQPINL IFRYLQNRSR IQVWLYEQVN MRIEGCIIGF DEYMNLVLDD		
	AEEIHSKTKS RKQLGRIMLK GDNITLLQSV SN		
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a		
	special request, please contact us.		
Characteristics:	<ul> <li>Made in Germany - from design to production - by highly experienced protein experts.</li> </ul>		
Characteristics:	Mouse Snrpe Protein (raised in E. Coli) purified by multi-step, protein-specific process to		
Characteristics:			
Characteristics:	<ul> <li>Mouse Snrpe Protein (raised in E. Coli) purified by multi-step, protein-specific process to ensure crystallization grade.</li> </ul>

Characteristics:	<ul> <li>Mouse Snrpe Protein (raised in E. Coli) purified by multi-step, protein-specific process to ensure crystallization grade.</li> <li>State-of-the-art algorithm used for plasmid design (Gene synthesis).</li> <li>This protein is a made to order protein and will be made for the first time for your order. Our</li> </ul>		

cannot be expressed or purified.

specific reference buffer.

In the unlikely event that the protein cannot be expressed or purified we do not charge anything (other companies might charge you for any performed steps in the expression process for custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression experiments or purification optimization).

When you order this made-to-order protein you will only pay upon receival of the correctly folded protein. With no financial risk on your end you can rest assured that our experienced protein experts will do everything to make sure that you receive the protein you ordered. The concentration of our recombinant proteins is measured using the absorbance at 280nm. The protein's absorbance will be measured in several dilutions and is measured against its

The concentration of the protein is calculated using its specific absorption coefficient. We use the Expasy's protparam tool to determine the absorption coefficient of each protein.

#### Purification:

Two step purification of proteins expressed in bacterial culture:

- 1. In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE.
- 2. Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.

#### Purity:

>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.

#### Sterility:

0.22 µm filtered

### Endotoxin Level:

Endotoxin has not been removed. Please contact us if you require endotoxin removal.

#### Grade:

Crystallography grade

# **Target Details**

Target:	SNRPE
Alternative Name:	Snrpe (SNRPE Products)
Background:	Core component of the spliceosomal U1, U2, U4 and U5 small nuclear ribonucleoproteins
	(snRNPs), the building blocks of the spliceosome. Thereby, plays an important role in the
	splicing of cellular pre-mRNAs. Most spliceosomal snRNPs contain a common set of Sm
	proteins SNRPB, SNRPD1, SNRPD2, SNRPD3, SNRPE, SNRPF and SNRPG that assemble in a
	heptameric protein ring on the Sm site of the small nuclear RNA to form the core snRNP. As

Expiry Date:

l arget Details		
	part of the U7 snRNP it is involved in histone 3'-end processing. May indirectly play a role in hair development (By similarity). {ECO:0000250}.	
Molecular Weight:	11.8 kDa Including tag.	
UniProt:	P62305	
Pathways:	Ribonucleoprotein Complex Subunit Organization, Hepatitis C	
Application Details		
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies	
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee	
	though.	
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the	
	recombinant protein with the default tag will be insoluble our protein lab may suggest a higher	
	molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible	
	options with you in detail to assure that you receive your protein of interest.	
Restrictions:	For Research Use only	
Handling		
Format:	Liquid	
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.	
Handling Advice:	Avoid repeated freeze-thaw cycles.	
Storage:	-80 °C	
Storage Comment:	Store at -80°C.	

Unlimited (if stored properly)
