antibodies

## Datasheet for ABIN3120843 SLC7A10 Protein (AA 1-530) (rho-1D4 tag)

Overview

Quantity:	1 mg
Target:	SLC7A10
Protein Characteristics:	AA 1-530
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This SLC7A10 protein is labelled with rho-1D4 tag.
Application:	Western Blotting (WB), SDS-PAGE (SDS), Crystallization (Crys), ELISA

## Product Details

Sequence:	MRRDSDMASH IQQPGGHGNP GPAPSPSPGP GPGPGASERV ALKKEIGLVS ACTIIIGNII
	GSGIFISPKG VLEHSGSVGL ALFVWVLGGG VTALGSLCYA ELGVAIPKSG GDYAYVTEIF
	GGLAGFLLLW SAVLIMYPTS LAVISMTFSN YVLQPVFPNC IPPATASRVL SMACLMLLTW

<ul> <li>Characteristics:</li> <li>Made in Germany - from design to production - by highly experienced pro</li> <li>Mouse Slc7a10 Protein (raised in Insect Cells) purified by multi-step, prot to ensure crystallization grade.</li> <li>State-of-the-art algorithm used for plasmid design (Gene synthesis).</li> <li>This protein is a made to order protein and will be made for the first time for experts in the lab will ensure that you receive a correctly folded protein.</li> <li>The big advantage of ordering our made-to-order proteins in comparison to</li> </ul>	
experts in the lab will ensure that you receive a correctly folded protein. The big advantage of ordering our made-to-order proteins in comparison to	·
The big advantage of ordering our made-to-order proteins in comparison to	r your order. Our
	ordering custom
made proteins from other companies is that there is no financial obligation	in case the protein
cannot be expressed or purified.	
In the unlikely event that the protein cannot be expressed or purified we do	not charge anything
(other companies might charge you for any performed steps in the express	ion process for
custom-made proteins, e.g. fees might apply for the expression plasmid, the expression plasmid, the	e first expression
When you order this made-to-order protein you will only pay upon receival o	of the correctly
folded protein. With no financial risk on your end you can rest assured that	our experienced
protein experts will do everything to make sure that you receive the protein	you ordered.
The concentration of our recombinant proteins is measured using the abso	rbance at 280nm.
The protein's absorbance will be measured in several dilutions and is measured in several dilutions and is measu	ured against its
The concentration of the protein is calculated using its specific absorption of	coefficient. We use
the Expasy's protparam tool to determine the absorption coefficient of each	ı protein.
Purification: Three step purification of membrane proteins expressed in baculovirus infe cells:	cted SF9 insect
1. Membrane proteins are fractioned by ultracentrifugation and subsequent different detergents (detergent screen). Samples are analyzed by Wester	n blot.
<ol> <li>The best performing detergent is used for solubilization and the proteins rho1D4 tag via two rho1D4 antibody columns: one DTT resistant, the othe fractions are analyzed by Western blot.</li> </ol>	
3. Protein containing fractions of the best purification are subjected to second through size exclusion chromatograph. Eluate fractions are analyzed by S Western blot.	
Purity: >95 % as determined by SDS PAGE, Size Exclusion Chromatography and We	estern Blot.
Sterility: 0.22 µm filtered	
Endotoxin Level: Protein is endotoxin-free.	
Grade: Crystallography grade

Target Details	
Target:	SLC7A10
Alternative Name:	Slc7a10 (SLC7A10 Products)
Background:	Sodium-independent, high affinity transport of small neutral D- and L-amino acids and amino acid-related compounds. May play a role in the modulation of glutamatergic transmission through mobilization of D-serine at the glutamatergic synapse. {ECO:0000269 PubMed:10734121}.
Molecular Weight:	58.7 kDa Including tag.
UniProt:	P63115
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)

**Image 1.** "Crystallography Grade" protein due to multi-step, protein-specific purification process
