## Datasheet for ABIN3121033 Testis Specific X-Linked Gene (TSX) (AA 1-144) protein (His tag)

Image

Overview

Quantity:	1 mg
Target:	Testis Specific X-Linked Gene (TSX)
Protein Characteristics:	AA 1-144
Origin:	Mouse
Source:	Escherichia coli (E. coli)
Protein Type:	Recombinant
Purification tag / Conjugate:	His tag
Application:	ELISA, Crystallization (Crys), SDS-PAGE (SDS), Western Blotting (WB)
Product Details	
Sequence:	MSEKQSPKTS EAECSAMDLP EFEDEENWLF KVLGFQPGPS SALDDDTDDQ ADEPLSAAEF
	LHLQDILQED RVSSTDDEDT CQAGCTEDDE TSHSDRDIDN NVKVITGNIK ASPSMYMEMF
	TDQNPQADQD LEETESDGAM NPTD
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
Characteristics:	special request, please contact us.
Characteristics:	<ul> <li>special request, please contact us.</li> <li>Made in Germany - from design to production - by highly experienced protein experts.</li> <li>Mouse Tsx Protein (raised in E. Coli) purified by multi-step, protein-specific process to ensure crystallization grade.</li> <li>State-of-the-art algorithm used for plasmid design (Gene synthesis).</li> </ul>

e proteins from other companies is that there is no financial obligation in case the protein
not be expressed or purified.
e unlikely event that the protein cannot be expressed or purified we do not charge anything
er companies might charge you for any performed steps in the expression process for
om-made proteins, e.g. fees might apply for the expression plasmid, the first expression
riments or purification optimization).
n you order this made-to-order protein you will only pay upon receival of the correctly
ed protein. With no financial risk on your end you can rest assured that our experienced
ein experts will do everything to make sure that you receive the protein you ordered.
concentration of our recombinant proteins is measured using the absorbance at 280nm.
protein's absorbance will be measured in several dilutions and is measured against its
ific reference buffer.
concentration of the protein is calculated using its specific absorption coefficient. We use
expasy's protparam tool to determine the absorption coefficient of each protein.
step purification of proteins expressed in bacterial culture:
a first purification step, the protein is purified from the cleared cell lysate using three fferent His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate actions are analyzed by SDS-PAGE.
otein containing fractions of the best purification are subjected to second purification step rough size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and estern blot.
% as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
µm filtered
otoxin has not been removed. Please contact us if you require endotoxin removal.

Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	

Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
