## KCNJ13 Protein (AA 156-360) (His tag)

Go to Product page

$\sim$					
	1/6	⊃r	\/I	$\triangle$	٨/

3.01.1011		
Quantity:	1 mg	
Target:	KCNJ13	
Protein Characteristics:	AA 156-360	
Origin:	Mouse	
Source:	Escherichia coli (E. coli)	
Protein Type:	Recombinant	
Purification tag / Conjugate:	This KCNJ13 protein is labelled with His tag.	
Application:	ELISA, SDS-PAGE (SDS), Western Blotting (WB), Crystallization (Crys)	
Product Details		
Sequence:	FVAKIARPKN RAFSIRFTDL AVVAHKDGKP NLIFQVANTR PSPLTNVRVS AVLYQERENG	
	ELYQTSVDFH LDGISSEECP FFIFPLTYYH TISPSSPLAT LLQHETPPHF ELVVFLSAMQ	
	EGTGEICQRR TSYLPSEIML HHRFAALMTR GSKGEYQVKM ENFDKTVPEH PTPVVSKSPH	
	RTDLDIHING QSIDNFQIAE TGLTE	
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a	
	special request, please contact us.	
Characteristics:	<ul> <li>Made in Germany - from design to production - by highly experienced protein experts.</li> <li>Mouse Kcnj13 Protein (raised in E. Coli) purified by multi-step, protein-specific process to ensure crystallization grade.</li> </ul>	
	State-of-the-art algorithm used for plasmid design (Gene synthesis).	
	This protein is a made to order protein and will be made for the first time for your order. Our	
	experts in the lab will ensure that you receive a correctly folded protein.	

The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

In the unlikely event that the protein cannot be expressed or purified we do not charge anything (other companies might charge you for any performed steps in the expression process for custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression experiments or purification optimization).

When you order this made-to-order protein you will only pay upon receival of the correctly folded protein. With no financial risk on your end you can rest assured that our experienced protein experts will do everything to make sure that you receive the protein you ordered. The concentration of our recombinant proteins is measured using the absorbance at 280nm. The protein's absorbance will be measured in several dilutions and is measured against its

The concentration of the protein is calculated using its specific absorption coefficient. We use the Expasy's protparam tool to determine the absorption coefficient of each protein.

#### Purification:

Two step purification of proteins expressed in bacterial culture:

- In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE.
- 2. Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.

Purity:

>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.

Sterility:

0.22 µm filtered

Endotoxin Level:

Endotoxin has not been removed. Please contact us if you require endotoxin removal.

Grade:

Crystallography grade

specific reference buffer.

#### **Target Details**

Target:	KCNJ13	
Alternative Name:	Kcnj13 (KCNJ13 Products)	
Background:	Inward rectifier potassium channels are characterized by a greater tendency to allow potassium to flow into the cell rather than out of it. Their voltage dependence is regulated leaves	
	the concentration of extracellular potassium, as external potassium is raised, the voltage range	

#### **Target Details**

of the channel opening shifts to more positive voltages. The inward rectification is mainly due
to the blockage of outward current by internal magnesium. KCNJ13 has a very low single
channel conductance, low sensitivity to block by external barium and cesium, and no
dependence of its inward rectification properties on the internal blocking particle magnesium
(By similarity). {ECO:0000250}.

#### Molecular Weight:

24.1 kDa Including tag.

UniProt:

P86046

### **Application Details**

Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies

as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee

though.

Comment: Protein has not been tested for activity yet. In cases in which it is highly likely that the

recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible

options with you in detail to assure that you receive your protein of interest.

Restrictions:

For Research Use only

#### Handling

Format:	Liquid	
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.	
Handling Advice:	Avoid repeated freeze-thaw cycles.	
Storage:	-80 °C	
Storage Comment:	Store at -80°C.	

**Expiry Date:** 

Unlimited (if stored properly)
