## Datasheet for ABIN3121190 NKX3-1 Protein (AA 1-237) (Strep Tag)

Overview

Quantity:	1 mg
Target:	NKX3-1
Protein Characteristics:	AA 1-237
Origin:	Mouse
Source:	Tobacco (Nicotiana tabacum)
Protein Type:	Recombinant
Purification tag / Conjugate:	This NKX3-1 protein is labelled with Strep Tag.
Application:	ELISA, Western Blotting (WB), SDS-PAGE (SDS)
Product Details	
Sequence:	MLRVAEPREP RVEAGGRSPW AAPPTQSKRL TSFLIQDILR DRAERHGGHS GNPQHSPDPR
	RDSAPEPDKA GGRGVAPEDP PSIRHSPAET PTEPESDAHF ETYLLDCEHN PGDLASAPQV
	TKQPQKRSRA AFSHTQVIEL ERKFSHQKYL SAPERAHLAK NLKLTETQVK IWFQNRRYKT
	KRKQLSEDLG VLEKNSPLSL PALKDDSLPS TSLVSVYTSY PYYPYLYCLG SWHPSFW
	Sequence without tag. The proposed Strep-Tag is based on experience s with the expression
	system, a different complexity of the protein could make another tag necessary. In case you
	have a special request, please contact us.
Characteristics:	Key Benefits:
	Made in Germany - from design to production - by highly experienced protein experts.
	Protein expressed with ALICE® and purified by multi-step, protein-specific process to ensure
	correct folding and modification.
	These proteins are normally active (enzymatically functional) as our customers have

• State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein.

The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

## Expression System:

 ALICE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require posttranslational modifications.

During lysate production, the cell wall and other cellular components that are not required for
protein production are removed, leaving only the protein production machinery and the
mitochondria to drive the reaction. During our lysate completion steps, the additional
components needed for protein production (amino acids, cofactors, etc.) are added to
produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

## Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- The protein's absorbance will be measured in several dilutions and is measured against its specific reference buffer.
- We use the Expasy's protparam tool to determine the absorption coefficient of each protein.

Purification:	Two step purification of proteins expressed in Almost Living Cell-Free Expression System
	(ALiCE®):
	<ol> <li>In a first purification step, the protein is purified from the cleared cell lysate using StrepTag capture material. Eluate fractions are analyzed by SDS-PAGE.</li> </ol>
	<ol> <li>Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.</li> </ol>
Purity:	$\ge$ 80 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Endotoxin Level:	Low Endotoxin less than 1 EU/mg (< 0.1 ng/mg)

Target:	NKX3-1
Alternative Name:	Nkx3-1 (NKX3-1 Products)
Background:	Homeobox protein Nkx-3.1 (Homeobox protein NK-3 homolog A),FUNCTION: Transcription
	factor, which binds preferentially the consensus sequence 5'-TAAGT[AG]-3' and can behave as a
	transcriptional repressor (By similarity). Plays an important role in normal prostate
	development, regulating proliferation of glandular epithelium and in the formation of ducts in
	prostate (PubMed:10215624). Acts as a tumor suppressor controlling prostate carcinogenesis,
	as shown by the ability to suppress growth and tumorigenicity of prostate carcinoma cells
	(PubMed:12036903). Plays a role in the formation of minor salivary glands (particularly palatine
	and lingual glands) (PubMed:10906459). {ECO:0000250 UniProtKB:Q99801,
	ECO:0000269 PubMed:10215624, ECO:0000269 PubMed:10906459,
	EC0:0000269 PubMed:12036903}.
Molecular Weight:	26.8 kDa
UniProt:	P97436
Pathways:	Intracellular Steroid Hormone Receptor Signaling Pathway, Positive Regulation of
	Endopeptidase Activity, Positive Regulation of Response to DNA Damage Stimulus
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a

## Handling

Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer. If you have a special request, please contact us.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
