antibodies

Datasheet for ABIN3121381 PAX5 Protein (AA 1-391) (Strep Tag)

Overview

Quantity:	1 mg
Target:	PAX5
Protein Characteristics:	AA 1-391
Origin:	Mouse
Source:	Tobacco (Nicotiana tabacum)
Protein Type:	Recombinant
Purification tag / Conjugate:	This PAX5 protein is labelled with Strep Tag.
Application:	Western Blotting (WB), ELISA, SDS-PAGE (SDS)

Product Details

Sequence:	MDLEKNYPTP RTIRTGHGGV NQLGGVFVNG RPLPDVVRQR IVELAHQGVR PCDISRQLRV
	SHGCVSKILG RYYETGSIKP GVIGGSKPKV ATPKVVEKIA EYKRQNPTMF AWEIRDRLLA
	ERVCDNDTVP SVSSINRIIR TKVQQPPNQP VPASSHSIVS TGSVTQVSSV STDSAGSSYS
	ISGILGITSP SADTNKRKRD EGIQESPVPN GHSLPGRDFL RKQMRGDLFT QQQLEVLDRV
	FERQHYSDIF TTTEPIKPEQ TTEYSAMASL AGGLDDMKAN LTSPTPADIG SSVPGPQSYP
	IVTGRDLAST TLPGYPPHVP PAGQGSYSAP TLTGMVPGSE FSGSPYSHPQ YSSYNDSWRF
	PNPGLLGSPY YYSPAARGAA PPAAATAYDR H
	Sequence without tag. The proposed Strep-Tag is based on experience s with the expression
	system, a different complexity of the protein could make another tag necessary. In case you
	have a special request, please contact us.

- · Made in Germany from design to production by highly experienced protein experts.
- Protein expressed with ALICE® and purified by multi-step, protein-specific process to ensure correct folding and modification.
- These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed).
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein.

The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Expression System:

- ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require posttranslational modifications.
- During lysate production, the cell wall and other cellular components that are not required for
 protein production are removed, leaving only the protein production machinery and the
 mitochondria to drive the reaction. During our lysate completion steps, the additional
 components needed for protein production (amino acids, cofactors, etc.) are added to
 produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- The protein's absorbance will be measured in several dilutions and is measured against its specific reference buffer.
- We use the Expasy's protparam tool to determine the absorption coefficient of each protein.

Purification:

Two step purification of proteins expressed in Almost Living Cell-Free Expression System (ALiCE®):

- 1. In a first purification step, the protein is purified from the cleared cell lysate using StrepTag capture material. Eluate fractions are analyzed by SDS-PAGE.
- Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.

Product Details

Purity:	\ge 80 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Endotoxin Level:	Low Endotoxin less than 1 EU/mg (< 0.1 ng/mg)

Target Details

Target:	PAX5
Alternative Name:	Pax5 (PAX5 Products)
Background:	Paired box protein Pax-5 (B-cell-specific transcription factor) (BSAP),FUNCTION: Transcription
	factor that plays an essential role in commitment of lymphoid progenitors to the B-lymphocyte
	lineage (PubMed:9042861). Fulfills a dual role by repressing B-lineage inappropriate genes and
	simultaneously activating B-lineage-specific genes (PubMed:16546096). In turn, regulates cell
	adhesion and migration, induces V(H)-to-D(H)J(H) recombination, facilitates pre-B-cell receptor
	signaling and promotes development to the mature B-cell stage (PubMed:9042861,
	PubMed:16546096). Repression of the cohesin-release factor WAPL causes global changes of
	the chromosomal architecture in pro-B cells to facilitate the generation of a diverse antibody
	repertoire (By similarity). {ECO:0000250 UniProtKB:Q02548, ECO:0000269 PubMed:16546096,
	ECO:0000269 PubMed:9042861}.
Molecular Weight:	42.2 kDa
UniProt:	Q02650
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a
	guarantee though.

Restrictions:

For Research Use only

Handling

Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer. If you have a special request, please contact us.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
