## Datasheet for ABIN3121493 NREP Protein (AA 1-68) (His tag)

Image

Overview

| 010111011                     |   |
|-------------------------------|---|
| Quantity:                     | 1 mg  |
| Target:                       | NREP (C5orf13)  |
| Protein Characteristics:      | AA 1-68   |
| Origin:                       | Mouse   |
| Source:                       | Insect Cells  |
| Protein Type:                 | Recombinant   |
| Purification tag / Conjugate: | This NREP protein is labelled with His tag.   |
| Application:                  | ELISA, Western Blotting (WB), SDS-PAGE (SDS), Crystallization (Crys)  |
| Product Details               |   |
| Sequence:                     | MVYYPELLVW VSQEPFAYKE MEGGLIKGRL PVPKEVNRKK MEETGAASLT PPGSREFTSP   |
|                               | ATSYLHPF  |
|                               | Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a  |
|                               | special request, please contact us.   |
| Characteristics:              | <ul> <li>Made in Germany - from design to production - by highly experienced protein experts.</li> <li>Mouse Nrep Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade.</li> </ul> |
|                               | State-of-the-art algorithm used for plasmid design (Gene synthesis).  |
|                               |   |
|                               | This protein is a made to order protein and will be made for the first time for your order. Our   |
|                               | This protein is a made to order protein and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein.   |
|                               |   |

| Product Details  |  |
|------------------|--|
|                  | cannot be expressed or purified.   |
|                  | In the unlikely event that the protein cannot be expressed or purified we do not charge anything   |
|                  | (other companies might charge you for any performed steps in the expression process for  |
|                  | custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression   |
|                  | experiments or purification optimization).   |
|                  | When you order this made-to-order protein you will only pay upon receival of the correctly   |
|                  | folded protein. With no financial risk on your end you can rest assured that our experienced   |
|                  | protein experts will do everything to make sure that you receive the protein you ordered.  |
|                  | The concentration of our recombinant proteins is measured using the absorbance at 280nm.   |
|                  | The protein's absorbance will be measured in several dilutions and is measured against its   |
|                  | specific reference buffer.   |
|                  | The concentration of the protein is calculated using its specific absorption coefficient. We use   |
|                  | the Expasy's protparam tool to determine the absorption coefficient of each protein.   |
| Purification:    | Two step purification of proteins expressed in baculovirus infected SF9 insect cells:  |
|                  | 1. In a first purification step, the protein is purified from the cleared cell lysate using three  |
|                  | different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate  |
|                  | fractions are analyzed by SDS-PAGE.  |
|                  | 2. Protein containing fractions of the best purification are subjected to second purification step<br>through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and |
|                  | Western blot.  |
| Purity:          | >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.   |
| Sterility:       | 0.22 µm filtered   |
| Endotoxin Level: | Protein is endotoxin free.   |
| Grade:           | Crystallography grade  |
|                  |  |

## Target Details

| Target:           | NREP (C5orf13)   |
|-------------------|--|
| Alternative Name: | Nrep (C5orf13 Products)  |
| Background:       | May have roles in cellular differentiation. Ectopic expression induces differentiation of fibroblast   |
|                   | into myofibroblast and myofibroblast ameboid migration. Increases retinoic-acid regulation of lipid-droplet biogenesis. May also have neural functions. Promotes axonal regeneration and |
|                   | augments motility of gliomas. Down-regulates the expression of TGFB1 and TGFB2 but not of  |
|                   | TGFB3. May play a role in the regulation of alveolar generation.   |

| Target Details      |   |
|---------------------|---|
|                     | {EC0:0000269 PubMed:12417574, EC0:0000269 PubMed:14985127,  |
|                     | ECO:0000269 PubMed:16934802, ECO:0000269 PubMed:18664493}.  |
| Molecular Weight:   | 8.6 kDa Including tag.  |
| UniProt:            | Q07475  |
| Application Details |   |
| Application Notes:  | In addition to the applications listed above we expect the protein to work for functional studies |
|                     | as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee |
|                     | though.   |
| Comment:            | Protein has not been tested for activity yet. In cases in which it is highly likely that the      |
|                     | recombinant protein with the default tag will be insoluble our protein lab may suggest a higher   |
|                     | molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible  |
|                     | options with you in detail to assure that you receive your protein of interest.                   |
| Restrictions:       | For Research Use only   |
| Handling            |   |
| Format:             | Liquid  |
| Buffer:             | 100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.        |
| Handling Advice:    | Avoid repeated freeze-thaw cycles.  |
| Storage:            | -80 °C  |
| Storage Comment:    | Store at -80°C.   |
| Expiry Date:        | Unlimited (if stored properly)  |

**Image 1.** "Crystallography Grade" protein due to multi-step, protein-specific purification process
