Datasheet for ABIN3121742 TRIM63 Protein (AA 1-350) (His tag)

Image

Overview

Quantity:	1 mg
Target:	TRIM63
Protein Characteristics:	AA 1-350
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This TRIM63 protein is labelled with His tag.
Application:	ELISA, Western Blotting (WB), Crystallization (Crys), SDS-PAGE (SDS)

Product Details

Sequence:	MDYKSGLIPD GNAMENLEKQ LICPICLEMF TKPVVILPCQ HNLCRKCAND IFQAANPYWT NRGGSVSMSG GRFRCPSCRH EVIMDRHGVY GLQRNLLVEN IIDIYKQECS SRPLQKGSHP MCKEHEDEKI NIYCLTCEVP TCSLCKVFGA HQACEVAPLQ SIFQGQKTEL SNCISMLVAG NDRVQTIISQ LVDSCRVTKE NSHQVKEELS QKFDTLYAIL DEKKSELLQR ITQEQEEKLG FIEALILQYR EQLEKSTKLV ETAIQSLDEP GGATFLSSAK QLIKSNVEAS KGCQLGKTEQ GFENMDYFTL DLEHIAEALR AIDFGTDEEE EEFTEEEADE EEGVTTEGHQ Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	 Made in Germany - from design to production - by highly experienced protein experts. Mouse Trim63 Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade. State-of-the-art algorithm used for plasmid design (Gene synthesis).

Product Details	
	This protein is a made to order protein and will be made for the first time for your order. Our
	experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
	 In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE.
	2. Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin free.
Grade:	Crystallography grade
Target Details	
Target:	TRIM63
Alternative Name:	Trim63 (TRIM63 Products)

E3 ubiquitin ligase. Mediates the ubiquitination and subsequent proteasomal degradation of

Background:

CKM, GMEB1 and HIBADH. Regulates the proteasomal degradation of muscle proteins under
amino acid starvation, where muscle protein is catabolized to provide other organs with amino
acids. Inhibits de novo skeletal muscle protein synthesis under amino acid starvation.
Regulates proteasomal degradation of cardiac troponin I/TNNI3 and probably of other
sarcomeric-associated proteins. May play a role in striated muscle atrophy and hypertrophy by
regulating an anti-hypertrophic PKC-mediated signaling pathway. May regulate the organization
of myofibrils through TTN in muscle cells. {EC0:0000269 PubMed:15596539,
ECO:0000269 PubMed:15601779, ECO:0000269 PubMed:18222470}.
40.4 kDa Including tag.
Q38HM4
In addition to the applications listed above we expect the protein to work for functional studies
as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Protein has not been tested for activity yet. In cases in which it is highly likely that the
recombinant protein with the default tag will be insoluble our protein lab may suggest a higher
molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible
options with you in detail to assure that you receive your protein of interest.
For Research Use only
Liquid
100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Avoid repeated freeze-thaw cycles.
-80 °C
Store at -80°C.
Unlimited (if stored properly)
