## Datasheet for ABIN3121878 INIP Protein (AA 2-104) (His tag)

Image

## Overview

1 mg
INIP
AA 2-104
Mouse
Escherichia coli (E. coli)
Recombinant
This INIP protein is labelled with His tag.
ELISA, Western Blotting (WB), Crystallization (Crys), SDS-PAGE (SDS)
AANPSGQGFQ NKNRVAILAE LDKEKRKLLM QNQSSTSHPG ASISLSRPSL TKDFRDHAEQ
QHIAAQQKAA LQHAHAHSSG YFITQDSAFG NLILPVLPRL DPE
Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
special request, please contact us.
Made in Germany - from design to production - by highly experienced protein experts.
• Mouse Inip Protein (raised in E. Coli) purified by multi-step, protein-specific process to ensure crystallization grade.
<ul> <li>State-of-the-art algorithm used for plasmid design (Gene synthesis).</li> </ul>
This protein is a made to order protein and will be made for the first time for your order. Our
experts in the lab will ensure that you receive a correctly folded protein.
The big advantage of ordering our made-to-order proteins in comparison to ordering custom
made proteins from other companies is that there is no financial obligation in case the protein

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 1/4 | Product datasheet for ABIN3121878 | 09/11/2023 | Copyright antibodies-online. Product Details	
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in bacterial culture:
	1. In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate
	fractions are analyzed by SDS-PAGE.
	<ol> <li>Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.</li> </ol>
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Endotoxin has not been removed. Please contact us if you require endotoxin removal.
Grade:	Crystallography grade

## Target Details

Target:	INIP
Alternative Name:	Inip (INIP Products)
Background:	Component of the SOSS complex, a multiprotein complex that functions downstream of the
	MRN complex to promote DNA repair and G2/M checkpoint. The SOSS complex associates
	with single-stranded DNA at DNA lesions and influences diverse endpoints in the cellular DNA
	damage response including cell-cycle checkpoint activation, recombinational repair and
	maintenance of genomic stability. Required for efficient homologous recombination-dependent

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 2/4 | Product datasheet for ABIN3121878 | 09/11/2023 | Copyright antibodies-online. Target Details	
	repair of double-strand breaks (DSBs) and ATM-dependent signaling pathways (By similarity). {ECO:0000250}.
Molecular Weight:	12.2 kDa Including tag.
UniProt:	Q3TXT3
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
