Datasheet for ABIN3121883 ARSG Protein (AA 17-525) (His tag)

Image

Overview

Quantity:	1 mg
Target:	ARSG
Protein Characteristics:	AA 17-525
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This ARSG protein is labelled with His tag.
Application:	SDS-PAGE (SDS), ELISA, Western Blotting (WB), Crystallization (Crys)

Characteristics:	
	Made in Germany - from design to production - by highly experienced protein experts. Mouse Arsg Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade. State-of-the-art algorithm used for plasmid design (Gene synthesis).
Т	his protein is a made to order protein and will be made for the first time for your order. Our
e	xperts in the lab will ensure that you receive a correctly folded protein.
Т	he big advantage of ordering our made-to-order proteins in comparison to ordering custom
	nade proteins from other companies is that there is no financial obligation in case the protein annot be expressed or purified.
lr	n the unlikely event that the protein cannot be expressed or purified we do not charge anything
(0	other companies might charge you for any performed steps in the expression process for
C	ustom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
e	xperiments or purification optimization).
W	/hen you order this made-to-order protein you will only pay upon receival of the correctly
fc	olded protein. With no financial risk on your end you can rest assured that our experienced
р	rotein experts will do everything to make sure that you receive the protein you ordered.
Т	he concentration of our recombinant proteins is measured using the absorbance at 280nm.
	he protein's absorbance will be measured in several dilutions and is measured against its pecific reference buffer.
Т	he concentration of the protein is calculated using its specific absorption coefficient. We use
tł	ne Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification: T	wo step purification of proteins expressed in baculovirus infected SF9 insect cells:
1	. In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE.
2	. Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.
Purity: >	95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility: 0	.22 µm filtered
Endotoxin Level: P	rotein is endotoxin free.
Grade: C	rystallography grade

Target Details	
Target:	ARSG
Alternative Name:	Arsg (ARSG Products)
Background:	Displays arylsulfatase activity with pseudosubstrates at acidic pH , such as p-nitrocatechol sulfate. {ECO:0000250}.
Molecular Weight:	56.6 kDa Including tag.
UniProt:	Q3TYD4
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.

Expiry Date:

Unlimited (if stored properly)
