Datasheet for ABIN3121921 PAG1 Protein (AA 39-429) (His tag)

Image

Overview

Quantity:	1 mg
Target:	PAG1
Protein Characteristics:	AA 39-429
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This PAG1 protein is labelled with His tag.
Application:	SDS-PAGE (SDS), Western Blotting (WB), Crystallization (Crys), ELISA

Product Details

Sequence:	CSTCDREKKP RQHSGDHENL MNVPSDKDMF SHSATSLTTD ALASSEQNGV LTNGDILSED
	STLTCMQHYE EVQTSASDLL DSQDSTGKAK CHQSRELPRI PPENAVDEIL TARAADTELG
	PGVEGPYEVL KDSSSQENMV EDCLYETVKE IKEVADKGQG GKSKSTSALK ELQGAPMEGK
	ADFAEYASVD RNKKCRHSAN AESILGTCSD LDEESPPPVP VKLLDENANL PQEGGGQAEE
	QAAEGTGGHS KRFSSLSYKS REEDPTLTEE EISAMYSSVN KPGQSAHKPG PCMKGPESAC
	HSMKGLPQRS SSSCNDLYAT VKDFEKTPNS ISTLPPARRP SEEPEPDYEA IQTLNREDEK
	VPLETNGHHV PKESDYESIG DLQQCRDVTR L
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	 Made in Germany - from design to production - by highly experienced protein experts. Mouse Pag1 Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade.

	State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made to order protein and will be made for the first time for your order. Our
	experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
	1. In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate
	fractions are analyzed by SDS-PAGE. 2. Protein containing fractions of the best purification are subjected to second purification step
	through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin free.
Grade:	Crystallography grade
Target Details	
Target:	PAG1
Alternative Name:	Pag1 (PAG1 Products)

Target Details

Background:	Negatively regulates TCR (T-cell antigen receptor)-mediated signaling in T-cells and FCER1
	(high affinity immunoglobulin epsilon receptor)-mediated signaling in mast cells. Promotes CSK
	activation and recruitment to lipid rafts, which results in LCK inhibition. Inhibits immunological
	synapse formation by preventing dynamic arrangement of lipid raft proteins. May be involved in
	cell adhesion signaling. {ECO:0000269 PubMed:12218089, ECO:0000269 PubMed:12612075,
	ECO:0000269 PubMed:14645715, ECO:0000269 PubMed:16166631}.
Molecular Weight:	43.5 kDa Including tag.
UniProt:	Q3U1F9
Pathways:	p53 Signaling, TCR Signaling, EGFR Signaling Pathway, CXCR4-mediated Signaling Events

Application Details

Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only

Handling

Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
