## Datasheet for ABIN3121966 DCP1B Protein (AA 2-578) (His tag)

Image

## Overview

Quantity:	1 mg
Target:	DCP1B
Protein Characteristics:	AA 2-578
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This DCP1B protein is labelled with His tag.
Application:	ELISA, Western Blotting (WB), Crystallization (Crys), SDS-PAGE (SDS)

## Product Details

	special request, please contact us.
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a

<ul> <li>Characteristics:</li> <li>Made in Germany - from design to production - by highly experienced pro</li> <li>Mouse Dcp1b Protein (raised in Insect Cells) purified by multi-step, protein</li> </ul>	·
<ul><li>to ensure crystallization grade.</li><li>State-of-the-art algorithm used for plasmid design (Gene synthesis).</li></ul>	
This protein is a made to order protein and will be made for the first time for	r your order. Our
experts in the lab will ensure that you receive a correctly folded protein.	
The big advantage of ordering our made-to-order proteins in comparison to	ordering custom
made proteins from other companies is that there is no financial obligation	in case the protein
cannot be expressed or purified.	
In the unlikely event that the protein cannot be expressed or purified we do r	not charge anything
(other companies might charge you for any performed steps in the expressi	on process for
custom-made proteins, e.g. fees might apply for the expression plasmid, the	e first expression
experiments or purification optimization).	
When you order this made-to-order protein you will only pay upon receival o	f the correctly
folded protein. With no financial risk on your end you can rest assured that o	our experienced
protein experts will do everything to make sure that you receive the protein y	you ordered.
The concentration of our recombinant proteins is measured using the absor	rbance at 280nm.
The protein's absorbance will be measured in several dilutions and is measured in several dilutions and is measu	ured against its
specific reference buffer.	
The concentration of the protein is calculated using its specific absorption of	coefficient. We use
the Expasy's protparam tool to determine the absorption coefficient of each	protein.
Purification: Two step purification of proteins expressed in baculovirus infected SF9 inse	ect cells:
<ol> <li>In a first purification step, the protein is purified from the cleared cell lysat different His-tag capture materials: high yield, EDTA resistant, or DTT resi fractions are analyzed by SDS-PAGE.</li> <li>Protein containing fractions of the best purification are subjected to seco</li> </ol>	stant. Eluate nd purification step
through size exclusion chromatography. Eluate fractions are analyzed by Western blot.	SDS-PAGE and
Purity: >95 % as determined by SDS PAGE, Size Exclusion Chromatography and We	estern Blot.
Sterility: 0.22 µm filtered	
Endotoxin Level: Protein is endotoxin free.	
Grade: Crystallography grade

Target Details	
Target:	DCP1B
Alternative Name:	Dcp1b (DCP1B Products)
Background:	May play a role in the degradation of mRNAs, both in normal mRNA turnover and in nonsense- mediated mRNA decay. May remove the 7-methyl guanine cap structure from mRNA molecules, yielding a 5'-phosphorylated mRNA fragment and 7m-GDP (By similarity). {ECO:0000250}.
Molecular Weight:	63.5 kDa Including tag.
UniProt:	Q3U564
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)

**Image 1.** "Crystallography Grade" protein due to multi-step, protein-specific purification process
