

# Datasheet for ABIN3122397 C9orf156 Protein (AA 1-431) (Strep Tag)

Overview

Quantity:	250 μg
Target:	C9orf156
Protein Characteristics:	AA 1-431
Origin:	Mouse
Source:	Cell-free protein synthesis (CFPS)
Protein Type:	Recombinant
Purification tag / Conjugate:	This C9orf156 protein is labelled with Strep Tag.
Application:	ELISA, Western Blotting (WB), SDS-PAGE (SDS)

## Product Details

Brand:	AliCE®
Sequence:	MRGLEKQGSC ATAAPCGCVQ PALEAGNLLT EPIGYLESCF PAKIGTPRQP SICSHSRACL
	KIRKNIFNNP EHSLMGLEEF SHVWILFVFH KNGHLNYKAK VQPPRLNGAK TGVFSTRSPH
	RPNAIGLTLA KLEKVEGGAV YLSGVDMIDG TPVLDIKPYI ADYDSPQNLS VHNDHHKLRA
	EAQVDGTANS CDQLLLSGRG KVQPRQSTKE RPKCLEDRTS GENSQKSRDM SEIQHTLPED
	RERALDLALE PSRGESMDMP ENQLGPPELK SFLEEGTDRP RKVEGALVLP GSSAETQWDA
	SYRARTADRV PYSVVPSWVT EAPVAPLQVR FTPHAEMDLR KLNSGDASQP SFKYFHSAEE
	AKRAIEAVLS ADPRSVYRRK LCEDRLFFFT VDTAHVTCWF GDGFAEVVRI KLASESVQVA
	DPEESLAALG S
	Sequence without tag. The proposed Strep-Tag is based on experience s with the expression
	system, a different complexity of the protein could make another tag necessary. In case you
	have a special request, please contact us.

## Product Details

#### Characteristics:

#### Key Benefits:

- Made in Germany from design to production by highly experienced protein experts.
- Protein expressed with ALiCE® and purified in one-step affinity chromatography
- These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed).
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

### Expression System:

- ALICE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require posttranslational modifications.
- During lysate production, the cell wall and other cellular components that are not required for
  protein production are removed, leaving only the protein production machinery and the
  mitochondria to drive the reaction. During our lysate completion steps, the additional
  components needed for protein production (amino acids, cofactors, etc.) are added to
  produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

### Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- The protein's absorbance will be measured against its specific reference buffer.
- We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.

Purification:	One-step Strep-tag purification of proteins expressed in Almost Living Cell-Free Expression System (AliCE®).
Purity:	> 70-80 % as determined by SDS PAGE, Western Blot and analytical SEC (HPLC).
Grade:	custom-made

# Target Details

Target:	C9orf156
Alternative Name:	Trmo (C9orf156 Products)
Background:	TRNA (adenine(37)-N6)-methyltransferase (EC 2.1.1) (tRNA methyltransferase 0),FUNCTION: S-adenosyl-L-methionine-dependent methyltransferase responsible for the addition of the methyl group in the formation of N6-methyl-N6-threonylcarbamoyladenosine at position 37 (m(6)t(6)A37) of the tRNA anticodon loop of tRNA(Ser)(GCU). The methyl group of m(6)t(6)A37 may improve the efficiency of the tRNA decoding ability. May bind to tRNA. {ECO:0000250 UniProtKB:P28634, ECO:0000250 UniProtKB:Q9BU70}.
Molecular Weight:	47.6 kDa
UniProt:	Q562D6
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.
Comment:	ALICE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require post-translational modifications.
	During lysate production, the cell wall and other cellular components that are not required for protein production are removed, leaving only the protein production machinery and the mitochondria to drive the reaction. During our lysate completion steps, the additional components needed for protein production (amino acids, cofactors, etc.) are added to produce something that functions like a cell, but without the constraints of a living system - all that's
	needed is the DNA that codes for the desired protein!
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer. Standard Storage Buffer: PBS pH 7.4, 10 % Glycerol <b>Might differ depending on protein.</b>
Handling Advice:	Avoid repeated freeze-thaw cycles.
