Datasheet for ABIN3122720 P4HA1 Protein (AA 18-534) (His tag)

Overview

Quantity:	1 mg
Target:	P4HA1
Protein Characteristics:	AA 18-534
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This P4HA1 protein is labelled with His tag.
Application:	Western Blotting (WB), ELISA, SDS-PAGE (SDS), Crystallization (Crys)

Product Details

Sequence:	HPGFFTSIGQ MTDLIHNEKD LVTSLKDYIK AEEDKLEQIK KWAEKLDRLT STATKDPEGF
	VGHPVNAFKL MKRLNTEWSE LENLILKDMS DGFISNLTIQ RQYFPNDEDQ VGAAKALFRL

 Characteristics: Made in Germany - from design to production - by highly experienced protein expert Mouse P4ha1 Protein (raised in Insect Cells) purified by multi-step, protein-specific protein (raised in Insect Cells) 	
to ensure crystallization grade.State-of-the-art algorithm used for plasmid design (Gene synthesis).	
This protein is a made to order protein and will be made for the first time for your orde	r. Our
experts in the lab will ensure that you receive a correctly folded protein.	
The big advantage of ordering our made-to-order proteins in comparison to ordering c	ustom
made proteins from other companies is that there is no financial obligation in case the	e protein
cannot be expressed or purified.	
In the unlikely event that the protein cannot be expressed or purified we do not charge	anything
(other companies might charge you for any performed steps in the expression process	s for
custom-made proteins, e.g. fees might apply for the expression plasmid, the first expre	ession
experiments or purification optimization).	
When you order this made-to-order protein you will only pay upon receival of the correc	ctly
folded protein. With no financial risk on your end you can rest assured that our experie	enced
protein experts will do everything to make sure that you receive the protein you ordere	d.
The concentration of our recombinant proteins is measured using the absorbance at 2	280nm.
The protein's absorbance will be measured in several dilutions and is measured agains	st its
specific reference buffer.	
The concentration of the protein is calculated using its specific absorption coefficient.	We use
the Expasy's protparam tool to determine the absorption coefficient of each protein.	
Purification: Two step purification of proteins expressed in baculovirus infected SF9 insect cells:	
 In a first purification step, the protein is purified from the cleared cell lysate using th different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Elua fractions are analyzed by SDS-PAGE. Protein containing fractions of the best purification are subjected to second purification 	ite ition step
through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE Western blot.	Eand
Purity: >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot	
Sterility: 0.22 µm filtered	
Endotoxin Level: Protein is endotoxin free.	
Grade: Crystallography grade

Target Details	
Target:	P4HA1
Alternative Name:	P4ha1 (P4HA1 Products)
Background:	Catalyzes the post-translational formation of 4-hydroxyproline in -Xaa-Pro-Gly- sequences in collagens and other proteins.
Molecular Weight:	60.0 kDa Including tag.
UniProt:	Q60715
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
