## Datasheet for ABIN3123144 SCN9A Protein (AA 1759-1984) (His tag)

Overview

Quantity:	1 mg
Target:	SCN9A
Protein Characteristics:	AA 1759-1984
Origin:	Mouse
Source:	Escherichia coli (E. coli)
Protein Type:	Recombinant
Purification tag / Conjugate:	This SCN9A protein is labelled with His tag.
Application:	ELISA, Western Blotting (WB), Crystallization (Crys), SDS-PAGE (SDS)
Product Details	
Sequence:	ENFSVATEES TEPLSEDDFE MFYEVWEKFD PDATQFIEFC KLSDFAAALD PPLLIAKPNK
	VQLIAMDLPM VSGDRIHCLD ILFAFTKRVL GESGEMDSLR SQMEERFMSA NPSKVSYEPI
	TTTLKRKQED VSATIIQRAY RRYRLRQNVK NISSIYIKDG DRDDDLPNKE DIVFDNVNEN
	SSPEKTDATA STISPPSYDS VTKPDQEKYE TDKTEKEDKE KDESRK
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	Made in Germany - from design to production - by highly experienced protein experts.
	<ul> <li>Mouse Scn9a Protein (raised in E. Coli) purified by multi-step, protein-specific process to ensure crystallization grade.</li> </ul>
	<ul> <li>State-of-the-art algorithm used for plasmid design (Gene synthesis).</li> </ul>
	This must in is a woods to and a must in and will be made for the first time for us or and a Our

This protein is a made to order protein and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein.

Target:	SCN9A
Target Details	
Grade:	Crystallography grade
Endotoxin Level:	Endotoxin has not been removed. Please contact us if you require endotoxin removal.
Sterility:	0.22 µm filtered
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
	<ol> <li>Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.</li> </ol>
	fractions are analyzed by SDS-PAGE.
	<ol> <li>In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate</li> </ol>
Purification:	Two step purification of proteins expressed in bacterial culture:
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	The protein's absorbance will be measured in several dilutions and is measured against its specific reference buffer.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	protein experts will do everything to make sure that you receive the protein you ordered.
	folded protein. With no financial risk on your end you can rest assured that our experienced
	When you order this made-to-order protein you will only pay upon receival of the correctly
	experiments or purification optimization).
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	(other companies might charge you for any performed steps in the expression process for
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	cannot be expressed or purified.
	made proteins from other companies is that there is no financial obligation in case the protein
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom

larget:	SCN9A
Alternative Name:	Scn9a (SCN9A Products)
Background:	Mediates the voltage-dependent sodium ion permeability of excitable membranes. Assuming
	opened or closed conformations in response to the voltage difference across the membrane,
	the protein forms a sodium-selective channel through which Na(+) ions may pass in

## Target Details

	accordance with their electrochemical gradient (PubMed:15123669). It is a tetrodotoxin-
	sensitive Na(+) channel isoform. Plays a role in pain mechanisms, especially in the
	development of inflammatory pain (PubMed:15314237). {ECO:0000250 UniProtKB:Q15858,
	ECO:0000269 PubMed:15123669, ECO:0000269 PubMed:15314237}.
Molecular Weight:	26.9 kDa Including tag.
UniProt:	Q62205
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee
	though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the
	recombinant protein with the default tag will be insoluble our protein lab may suggest a higher
	molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible
	options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)

**Image 1.** "Crystallography Grade" protein due to multi-step, protein-specific purification process
