Datasheet for ABIN3123156 THRSP Protein (AA 1-150) (His tag)

Image

Overview

Quantity:	1 mg
Target:	THRSP
Protein Characteristics:	AA 1-150
Origin:	Mouse
Source:	Escherichia coli (E. coli)
Protein Type:	Recombinant
Purification tag / Conjugate:	This THRSP protein is labelled with His tag.
Application:	Western Blotting (WB), SDS-PAGE (SDS), ELISA, Crystallization (Crys)
Product Details	
Sequence:	MQVLTKRYPK NCLLTVMDRY SAVVRNMEQV VMIPSLLRDV QLSGPGGSVQ DGAPDLYTYF
	TMLKSICVEV DHGLLPREEW QAKVAGNETS EAENDAAETE EAEEDRISEE LDLEAQFHLH
	FCSLHHILTH LTRKAQEVTR KYQEMTGQVL
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	 Made in Germany - from design to production - by highly experienced protein experts. Mouse Thrsp Protein (raised in E. Coli) purified by multi-step, protein-specific process to
	 Modse Thisp Protein (raised in E. coil) purmed by mathematic, protein specific process to ensure crystallization grade. State-of-the-art algorithm used for plasmid design (Gene synthesis).
	ensure crystallization grade.
	ensure crystallization grade.State-of-the-art algorithm used for plasmid design (Gene synthesis).

	function as transcriptional coactivator. May modulate the transcription factor activity of THRB
	lipogenesis by interacting with MID1IP1 and preventing its interaction with ACACA. May
-	for the biosynthesis of triglycerides with medium-length fatty acid chains. May modulate
Background:	Plays a role in the regulation of lipogenesis, especially in lactating mammary gland. Important
Alternative Name:	Thrsp (THRSP Products)
Target:	THRSP
Target Details	
Grade:	Crystallography grade
Endotoxin Level:	Endotoxin has not been removed. Please contact us if you require endotoxin removal.
Sterility:	0.22 µm filtered
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
	fractions are analyzed by SDS-PAGE. 2. Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.
	1. In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate
Purification:	Two step purification of proteins expressed in bacterial culture:
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	The protein's absorbance will be measured in several dilutions and is measured against its specific reference buffer.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	protein experts will do everything to make sure that you receive the protein you ordered.
	folded protein. With no financial risk on your end you can rest assured that our experienced
	When you order this made-to-order protein you will only pay upon receival of the correctly
	experiments or purification optimization).
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	(other companies might charge you for any performed steps in the expression process for
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	cannot be expressed or purified.

Target Details	
	(By similarity). {ECO:0000250, ECO:0000269 PubMed:15890771,
	ECO:0000269 PubMed:20952656}.
Molecular Weight:	18.0 kDa Including tag.
UniProt:	Q62264
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee
	though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the
	recombinant protein with the default tag will be insoluble our protein lab may suggest a higher
	molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible
	options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
