

# Datasheet for ABIN3123947

# RPH3AL Protein (AA 1-302) (Strep Tag)

# Overview

Quantity:	250 μg
Target:	RPH3AL
Protein Characteristics:	AA 1-302
Origin:	Mouse
Source:	Cell-free protein synthesis (CFPS)
Protein Type:	Recombinant
Purification tag / Conjugate:	This RPH3AL protein is labelled with Strep Tag.
Application:	SDS-PAGE (SDS), ELISA, Western Blotting (WB)

· ······	. The full to the protein to tabelled that etc. protein	
Application:	SDS-PAGE (SDS), ELISA, Western Blotting (WB)	
Product Details		
Brand:	AliCE®	
Sequence:	MADTIFSSGN DQWVCPNDRQ LALRAKLQTG WSVHTYQTEK QRRSQCLSPG ELEIILQVIQ	
	RAERLDILEQ QRIGRLVERL ETMQRNVMGN GLSQCLLCGE VLGFLGSSSV FCKDCRKKVC	
	TKCGIEASPG QKRPLWLCKI CSEQREVWKR SGAWFYKGLP KYILPLKTPG RADDPHFRPL	
	PVEPTETQPP SAETSRVYTW ARGRVVSSDS DSDSDLSSSS LEDRPLPSGV KGTKGDKPRG	
	DSGASMESPR LGPARPPSHL SGSQSSLGSE AGTGATEPQG GTPAQPEPRV PGKRHTWATP RY	
	Sequence without tag. The proposed Strep-Tag is based on experience s with the expression	
	system, a different complexity of the protein could make another tag necessary. In case you	
	have a special request, please contact us.	
Characteristics:	Key Benefits:	
	Made in Germany - from design to production - by highly experienced protein experts.	

- · Protein expressed with ALiCE® and purified in one-step affinity chromatography
- · These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed).
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

## Expression System:

- · ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require posttranslational modifications.
- · During lysate production, the cell wall and other cellular components that are not required for protein production are removed, leaving only the protein production machinery and the mitochondria to drive the reaction. During our lysate completion steps, the additional components needed for protein production (amino acids, cofactors, etc.) are added to produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

## Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- · The protein's absorbance will be measured against its specific reference buffer.
- We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.

Purification:	One-step Strep-tag purification of proteins expressed in Almost Living Cell-Free Expression System (AliCE®).
Purity:	> 70-80 % as determined by SDS PAGE, Western Blot and analytical SEC (HPLC).
Grade:	custom-made
Target Details	

### rarget Details

Target:	RPH3AL
Alternative Name:	Rph3al (RPH3AL Products)

Background:	Rab effector Noc2 (No C2 domains protein) (Rabphilin-3A-like protein),FUNCTION: Rab GTPase	
	effector involved in the late steps of regulated exocytosis, both in endocrine and exocrine cells.	
	Regulates the exocytosis of dense-core vesicles in neuroendocrine cells through interaction	
	with RAB27A. Acts as a potential RAB3B effector protein in epithelial cells.	
	{ECO:0000269 PubMed:14722103, ECO:0000269 PubMed:15159548}.	
Molecular Weight:	33.3 kDa	
UniProt:	Q768S4	
Pathways:	Carbohydrate Homeostasis, Regulation of G-Protein Coupled Receptor Protein Signaling	
Application Details		
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies	
	as well. As the protein has not been tested for functional studies yet we cannot offer a	
	guarantee though.	
Comment:	ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from	
	Nicotiana tabacum c.v This contains all the protein expression machinery needed to produce	
	even the most difficult-to-express proteins, including those that require post-translational modifications.	
	During lysate production, the cell wall and other cellular components that are not required for	
	protein production are removed, leaving only the protein production machinery and the	
	mitochondria to drive the reaction. During our lysate completion steps, the additional	
	components needed for protein production (amino acids, cofactors, etc.) are added to produce	
	something that functions like a cell, but without the constraints of a living system - all that's	
	needed is the DNA that codes for the desired protein!
