TNFSF18 Protein (AA 1-173) (Strep Tag)

Go to Product page

()	11/0	K\ /	iew	1
	\cup	'I V/I	$\square \vee \vee$	ı

Quantity:	1 mg
Target:	TNFSF18
Protein Characteristics:	AA 1-173
Origin:	Mouse
Source:	Tobacco (Nicotiana tabacum)
Protein Type:	Recombinant
Purification tag / Conjugate:	This TNFSF18 protein is labelled with Strep Tag.
Application:	Western Blotting (WB), SDS-PAGE (SDS), ELISA

Purification tag / Conjugate:	This TNFSF18 protein is labelled with Strep Tag.	
Application:	Western Blotting (WB), SDS-PAGE (SDS), ELISA	
Product Details		
Sequence:	MEEMPLRESS PQRAERCKKS WLLCIVALLL MLLCSLGTLI YTSLKPTAIE SCMVKFELSS

	QTLMNDFQIL PIGGVYELHA GDNIYLKFNS KDHIQKTNTY WGIILMPDLP FIS	
	Sequence without tag. The proposed Strep-Tag is based on experience s with the expression	
	system, a different complexity of the protein could make another tag necessary. In case you	
	have a special request, please contact us.	
Characteristics:	Key Benefits:	
	Made in Germany - from design to production - by highly experienced protein experts.	
	 Protein expressed with ALiCE® and purified by multi-step, protein-specific process to ensure correct folding and modification.

reported (not tested by us and not guaranteed).

· These proteins are normally active (enzymatically functional) as our customers have

• State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein.

The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Expression System:

- ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require posttranslational modifications.
- During lysate production, the cell wall and other cellular components that are not required for
 protein production are removed, leaving only the protein production machinery and the
 mitochondria to drive the reaction. During our lysate completion steps, the additional
 components needed for protein production (amino acids, cofactors, etc.) are added to
 produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- The protein's absorbance will be measured in several dilutions and is measured against its specific reference buffer.
- We use the Expasy's protparam tool to determine the absorption coefficient of each protein.

Purification:

Two step purification of proteins expressed in Almost Living Cell-Free Expression System (ALiCE®):

- 1. In a first purification step, the protein is purified from the cleared cell lysate using StrepTag capture material. Eluate fractions are analyzed by SDS-PAGE.
- Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.

Purity:

≥ 80 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.

Endotoxin Level:

Low Endotoxin less than 1 EU/mg (< 0.1 ng/mg)

Target Details

Target:	TNFSF18	
Alternative Name:	Tnfsf18 (TNFSF18 Products)	
Background:	Tumor necrosis factor ligand superfamily member 18 (GITR ligand) (GITRL) (Glucocorticoid-	
	induced TNF-related ligand), FUNCTION: Cytokine that binds to TNFRSF18/AITR/GITR	
	(PubMed:14521928, PubMed:14647196). Regulates T-cell responses (PubMed:14647196). Car	
	function as costimulator and lower the threshold for T-cell activation and T-cell proliferation	
	(PubMed:14608036, PubMed:15128759). Important for interactions between activated T-	
	lymphocytes and endothelial cells. Mediates activation of NF-kappa-B (PubMed:14521928,	
	PubMed:14647196, PubMed:18178614). Triggers increased phosphorylation of STAT1 and up	
	regulates expression of VCAM1 and ICAM1 (By similarity). Promotes leukocyte adhesion to	
	endothelial cells (PubMed:23892569). Regulates migration of monocytes from the splenic	
	reservoir to sites of inflammation (PubMed:24107315). {ECO:0000250 UniProtKB:Q9UNG2,	
	ECO:0000269 PubMed:14521928, ECO:0000269 PubMed:14608036,

Application Details

Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer. If you have a special request, please contact us.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
