Datasheet for ABIN3124206 KIRREL2 Protein (AA 20-700) (rho-1D4 tag)

-online.com antibodies

Overview

Quantity:	1 mg
Target:	KIRREL2
Protein Characteristics:	AA 20-700
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This KIRREL2 protein is labelled with rho-1D4 tag.
Application:	ELISA, Western Blotting (WB), Crystallization (Crys), SDS-PAGE (SDS)

## Product Details

Sequence:	SPHFLQQPED MVVLLGEEAR LPCALGAYRG LVQWTKDGLA LGGERDLPGW SRYWISGNSA

special request, please contact us.         Characteristics:       • Made in Germany - from design to production - by highly experienced protein experts.         • Mouse Kirrel2 Protein (raised in Insect Cells) purified by multi-step, protein-specific procesto ensure crystallization grade.         • State-of-the-art algorithm used for plasmid design (Gene synthesis).         This protein is a made to order protein and will be made for the first time for your order. Ou experts in the lab will ensure that you receive a correctly folded protein.         The big advantage of ordering our made-to-order proteins in comparison to ordering custor made proteins from other companies is that there is no financial obligation in case the prote cannot be expressed or purified.         In the unlikely event that the protein cannot be expressed or purified we do not charge anyt (other companies might charge you for any performed steps in the expression process for custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression experiments or purification optimization).         When you order this made-to-order protein you will only pay upon receival of the correctly folded protein. With no financial risk on your end you can rest assured that our experienced

When you order this made-to-order protein you will only pay upon receival of the correctly	r
protein experts will do everything to make sure that you receive the protein you ordered. The concentration of our recombinant proteins is measured using the absorbance at 280nr	d
The protein's absorbance will be measured in several dilutions and is measured against its specific reference buffer.	
The concentration of the protein is calculated using its specific absorption coefficient. We ut the Expasy's protparam tool to determine the absorption coefficient of each protein.	use
Purification: Three step purification of membrane proteins expressed in baculovirus infected SF9 insect cells:	:t
<ol> <li>Membrane proteins are fractioned by ultracentrifugation and subsequently solubilized widdifferent detergents (detergent screen). Samples are analyzed by Western blot.</li> <li>The best performing detergent is used for solubilization and the proteins are purified via rho1D4 tag via two rho1D4 antibody columns: one DTT resistant, the other one not. Eluat fractions are analyzed by Western blot.</li> <li>Protein containing fractions of the best purification are subjected to second purification strongh size exclusion chromatograph. Eluate fractions are analyzed by SDS-PAGE and Western blot.</li> </ol>	a their ate n step
Purity: >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.	
Sterility: 0.22 µm filtered

Product Details	
Endotoxin Level:	Protein is endotoxin-free.
Grade:	Crystallography grade
Target Details	
Target:	KIRREL2
Alternative Name:	Kirrel2 (KIRREL2 Products)
Molecular Weight:	73.8 kDa Including tag.
UniProt:	Q7TSU7
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
