antibodies

Datasheet for ABIN3124210 ENKD1 Protein (AA 1-346) (Strep Tag)

Overview

Quantity:	1 mg
Target:	ENKD1
Protein Characteristics:	AA 1-346
Origin:	Mouse
Source:	Tobacco (Nicotiana tabacum)
Protein Type:	Recombinant
Purification tag / Conjugate:	This ENKD1 protein is labelled with Strep Tag.
Application:	ELISA, Western Blotting (WB), SDS-PAGE (SDS)

Product Details

Sequence:	MCEGPSRISG PIPPDPTLCP DYYRRPASAQ GRLEGNALKL DLLTSGRDLD SSPPRGPRIR
	PEAREILERG QRGVGDVLLQ LGCISLGSGV SPKRKNPKDH EKENLRRIKE IQRRFQDQER
	SREQGQPKPL KALWRSPKYD NVESRVKARM KELGPTSVTE PAHFLRAHSR CGPGLPPSRA
	SSPQLALPGP QAKGPGLGVD FISRNALAAK RAPRRHSRSL QVLAQVQEQQ RQAQERYNAT
	QKGHVPHYLL ERRDLWRKEA EARQRSQPDP SMPPGHTLMP ENQRLETLNN LLQSQSQLLR
	ELVLLPAGAD SLRAQGHRAE LDRKLVQIEE AIKIFSRPKV FVKMDT
	Sequence without tag. The proposed Strep-Tag is based on experience s with the expression
	system, a different complexity of the protein could make another tag necessary. In case you
	have a special request, please contact us.
Characteristics:	Key Benefits:
	Made in Germany - from design to production - by highly experienced protein experts.
	• Protein expressed with ALiCE® and purified by multi-step, protein-specific process to ensure

All rights reserved. correct folding and modification.

- These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed).
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein. The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Expression System:

- ALICE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require post-translational modifications.
- During lysate production, the cell wall and other cellular components that are not required for
 protein production are removed, leaving only the protein production machinery and the
 mitochondria to drive the reaction. During our lysate completion steps, the additional
 components needed for protein production (amino acids, cofactors, etc.) are added to
 produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- The protein's absorbance will be measured in several dilutions and is measured against its specific reference buffer.
- We use the Expasy's protparam tool to determine the absorption coefficient of each protein.

Purification:	Two step purification of proteins expressed in Almost Living Cell-Free Expression System
	(ALICE®):
	1. In a first purification step, the protein is purified from the cleared cell lysate using StrepTag capture material. Eluate fractions are analyzed by SDS-PAGE.
	 Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.
Purity:	\ge 80 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.

Product Details	
Endotoxin Level:	Low Endotoxin less than 1 EU/mg (< 0.1 ng/mg)
Grade:	Crystallography grade

Target Details

Target:	ENKD1
Alternative Name:	Enkd1 (ENKD1 Products)
Background:	Enkurin domain-containing protein 1,FUNCTION: Microtubule-binding protein which regulates
	microtubule organization and stability (By similarity). Promotes the stability of astral
	microtubules and facilitates the proper orientation of the mitotic spindle (By similarity). This
	allows the oriented division of basal keratinocytes and contributes to epidermal stratification
	(PubMed:35197565). Required for the assembly of both primary and motile cilia
	(PubMed:35301795, PubMed:35072334). Destabilizes the interaction between CCP110 and
	CEP97 by competing with CEP97 for binding to CCP110 which promotes the removal of
	CCP110 and CEP97 from the mother centriole and allows the initiation of ciliogenesis
	(PubMed:35301795). {ECO:0000250 UniProtKB:Q9H0I2, ECO:0000269 PubMed:35072334,
	ECO:0000269 PubMed:35197565, ECO:0000269 PubMed:35301795}.
Molecular Weight:	39.0 kDa
UniProt:	Q7TSV9
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a
	guarantee though.
Comment:	guarantee though. ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from

Handling

Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer. If you have a special request, please contact us.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
