Datasheet for ABIN3124437 LRFN4 Protein (AA 17-518) (His tag)

Overview

Quantity:	1 mg
Target:	LRFN4
Protein Characteristics:	AA 17-518
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This LRFN4 protein is labelled with His tag.
Application:	ELISA, Crystallization (Crys), SDS-PAGE (SDS), Western Blotting (WB)

Product Details

Sequence:	CPLPCVCQNL SESLSTLCAH RGLLFVPPNV DRRTVELRLA DNFIQALGPP DFRNMTGLVD
	LTLSRNAITR IGARSFGDLE SLRSLHLDGN RLVELGSSSL RGPVNLQHLI LSGNQLGRIA
	PGAFDDFLDS LEDLDVSYNN LRQVPWAGIG SMPALHTLNL DHNLIDALPP GVFAQLSQLS
	RLDLTSNRLA TLAPDPLFSR GRDAEASPSP LVLSFSGNPL HCNCELLWLR RLARPDDLET
	CASPPTLAGR YFWAVPEGEF SCEPPLIARH TQRLWVLEGQ RATLRCRALG DPVPTMHWVG
	PDDRLVGNSS RAWAFPNGTL EIGVTGAGDA GAYTCIATNP AGEATARVEL RVLALPHGGN
	TSAEGGRPGP SDIAASARTA AEGEGTLESE PAVQVTEVTA TSGLVSWGLG RPADPVWMFQ
	IQYNSSEDET LIYRIVPASS HHFLLKHLVP GADYDLCLLA LSPAAGPSDL TATRLLGCAH
	FSTLPATPLC HALQAHVLGG TL
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.

 Characteristics: Made in Germany - from design to production - by highly experienced protein experts Mouse Lrfn4 Protein (raised in Insect Cells) purified by multi-step, protein-specific preensure crystallization grade. State-of-the-art algorithm used for plasmid design (Gene synthesis). This protein is a made to order protein and will be made for the first time for your order experts in the lab will ensure that you receive a correctly folded protein. The big advantage of ordering our made-to-order proteins in comparison to ordering cumade proteins from other companies is that there is no financial obligation in case the cannot be expressed or purified. In the unlikely event that the protein cannot be expressed or purified we do not charge a (other companies might charge you for any performed steps in the expression process custom-made proteins, e.g. fees might apply for the expression plasmid, the first expre experiments or purification optimization).

experiments or purification optimization).	sion
When you order this made-to-order protein you will only pay upon receival of the correc	ly
folded protein. With no financial risk on your end you can rest assured that our experier	ced
protein experts will do everything to make sure that you receive the protein you ordered	
The concentration of our recombinant proteins is measured using the absorbance at 2	0nm.
The protein's absorbance will be measured in several dilutions and is measured agains	its
specific reference buffer.	
The concentration of the protein is calculated using its specific absorption coefficient.	Ve use
the Expasy's protparam tool to determine the absorption coefficient of each protein.	
Purification: Two step purification of proteins expressed in baculovirus infected SF9 insect cells:	
 In a first purification step, the protein is purified from the cleared cell lysate using thr different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluat fractions are analyzed by SDS-PAGE. 	
 Protein containing fractions of the best purification are subjected to second purificat through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE Western blot. 	•
Purity: >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.	
Sterility: 0.22 µm filtered	
Endotoxin Level: Protein is endotoxin free.	
Grade: Crystallography grade

Target Details	
Target:	LRFN4
Alternative Name:	Lrfn4 (LRFN4 Products)
Background:	Promotes neurite outgrowth in hippocampal neurons. May play a role in redistributing DLG4 to the cell periphery. {ECO:0000269 PubMed:16828986, ECO:0000269 PubMed:18585462}.
Molecular Weight:	54.7 kDa Including tag.
UniProt:	Q80XU8
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
