| Target Details      |   |
| Target:             | TMPRSS7   |
| Alternative Name:   | Tmprss7 (TMPRSS7 Products)  |
| Background:         | Serine protease which preferentially hydrolyzes peptides with Arg at the P1 position. {ECO:0000269 PubMed:15853774}.  |
| Molecular Weight:   | 93.8 kDa Including tag.   |
| UniProt:            | Q8BIK6  |
| Application Details |   |
| Application Notes:  | In addition to the applications listed above we expect the protein to work for functional studies<br>as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee<br>though.   |
| Comment:            | Protein has not been tested for activity yet. In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest. |
