## Datasheet for ABIN3124949 CSNK1A1 Protein (AA 2-337) (His tag)

Image

## Overview

Quantity:	1 mg
Target:	CSNK1A1
Protein Characteristics:	AA 2-337
Origin:	Mouse
Source:	Escherichia coli (E. coli)
Protein Type:	Recombinant
Purification tag / Conjugate:	This CSNK1A1 protein is labelled with His tag.
Application:	SDS-PAGE (SDS), Western Blotting (WB), ELISA, Crystallization (Crys)

## Product Details

Sequence:	ASSSGSKAEF IVGGKYKLVR KIGSGSFGDI YLAINITNGE EVAVKLESQK ARHPQLLYES
	KLYKILQGGV GIPHIRWYGQ EKDYNVLVMD LLGPSLEDLF NFCSRRFTMK TVLMLADQMI
	SRIEYVHTKN FIHRDIKPDN FLMGIGRHCN KLFLIDFGLA KKYRDNRTRQ HIPYREDKNL
	TGTARYASIN AHLGIEQSRR DDMESLGYVL MYFNRTSLPW QGLKAATKKQ KYEKISEKKM
	STPVEVLCKG FPAEFAMYLN YCRGLRFEEA PDYMYLRQLF RILFRTLNHQ YDYTFDWTML
	KQKAAQQAAS SSGQGQQAQT PTGKQTDKTK SNMKGF
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	<ul> <li>special request, please contact us.</li> <li>Made in Germany - from design to production - by highly experienced protein experts.</li> </ul>

Product Details	
	This protein is a made to order protein and will be made for the first time for your order. Our
	experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in bacterial culture:
	1. In a first purification step, the protein is purified from the cleared cell lysate using three
	different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate
	fractions are analyzed by SDS-PAGE. 2. Protein containing fractions of the best purification are subjected to second purification step
	through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and
	Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Endotoxin has not been removed. Please contact us if you require endotoxin removal.
Grade:	Crystallography grade
Target Details	
Target:	CSNK1A1
Alternative Name:	Csnk1a1 (CSNK1A1 Products)

Background: Casein kinases are operationally defined by their preferential utilization of acidic proteins such

## Target Details

	as caseins as substrates. Can phosphorylate a large number of proteins. Participates in Wnt
	signaling. Phosphorylates CTNNB1 at 'Ser-45'. May phosphorylate PER1 and PER2. May play a
	role in segregating chromosomes during mitosis. May play a role in keratin cytoskeleton
	disassembly and thereby, it may regulate epithelial cell migration (By similarity).
	{ECO:0000250 UniProtKB:P48729, ECO:0000269 PubMed:21930935}.
Molecular Weight:	39.7 kDa Including tag.
UniProt:	Q8BK63
Pathways:	WNT Signaling, Hedgehog Signaling
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee
	though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the
	recombinant protein with the default tag will be insoluble our protein lab may suggest a higher
	molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible
	options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Flandling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.

Expiry Date: Unlimited (if stored properly)

**Image 1.** "Crystallography Grade" protein due to multi-step, protein-specific purification process
