Datasheet for ABIN3125000 SLC7A4 Protein (AA 1-635) (rho-1D4 tag)

Overview

Image

	1
Quantity:	1 mg
Target:	SLC7A4
Protein Characteristics:	AA 1-635
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This SLC7A4 protein is labelled with rho-1D4 tag.
Application:	ELISA, Western Blotting (WB), Crystallization (Crys), SDS-PAGE (SDS)

Product Details

 Characteristics: Made in Germany - from design to production - by highly experienced protein experts Mouse Slc7a4 Protein (raised in Insect Cells) purified by multi-step, protein-specific p to ensure crystallization grade. State-of-the-art algorithm used for plasmid design (Gene synthesis). This protein is a made to order protein and will be made for the first time for your order experts in the lab will ensure that you receive a correctly folded protein. The big advantage of ordering our made-to-order proteins in comparison to ordering cu made proteins from other companies is that there is no financial obligation in case the cannot be expressed or purified. In the unlikely event that the protein cannot be expressed or purified we do not charge a (other companies might charge you for any performed steps in the expression process custom-made proteins, e.g. fees might apply for the expression plasmid, the first exprese experiments or purification optimization). When you order this made-to-order protein you will only pay upon receival of the correct folded protein. With no financial risk on your end you can rest assured that our experiments or purification.

protein experts will do everything to make sure that you receive the protein you ordered	l.
The concentration of our recombinant proteins is measured using the absorbance at 28	80nm.
The protein's absorbance will be measured in several dilutions and is measured agains	t its
specific reference buffer.	
The concentration of the protein is calculated using its specific absorption coefficient.	We use
the Expasy's protparam tool to determine the absorption coefficient of each protein.	
Purification: Three step purification of membrane proteins expressed in baculovirus infected SF9 ins	sect
cells:	
1. Membrane proteins are fractioned by ultracentrifugation and subsequently solubilize	d with
different detergents (detergent screen). Samples are analyzed by Western blot. 2. The best performing detergent is used for solubilization and the proteins are purified	via their
rho1D4 tag via two rho1D4 antibody columns: one DTT resistant, the other one not. E	
fractions are analyzed by Western blot.	
3. Protein containing fractions of the best purification are subjected to second purificat	
through size exclusion chromatograph. Eluate fractions are analyzed by SDS-PAGE a Western blot.	ind
Western Diot.	
Purity: >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.	
Sterility: 0.22 µm filtered	
Endotoxin Level: Protein is endotoxin-free.

Product Details

Grade:

Crystallography grade

Target Details

Target:	SLC7A4
Alternative Name:	Slc7a4 (SLC7A4 Products)
Background:	Involved in the transport of the cationic amino acids (arginine, lysine and ornithine). {ECO:0000250}.
Molecular Weight:	69.5 kDa Including tag.
UniProt:	Q8BLQ7

Application Details

Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only

Handling

Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
