Datasheet for ABIN3125437 PIGT Protein (AA 26-525) (His tag)

Image

Overview

Quantity:	1 mg
Target:	PIGT
Protein Characteristics:	AA 26-525
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This PIGT protein is labelled with His tag.
Application:	ELISA, Western Blotting (WB), Crystallization (Crys), SDS-PAGE (SDS)

Product Details

Sequence:	CAEGPRDSLR EELVITPLPS GDVAATFQFR TRWDSDLQRE GVSHYRLFPK ALGQLISKYS
	LRELHLSFTQ GFWRTRYWGP PFLQAPSGAE LWVWFQDTVT DVDKSWRELS NVLSGIFCAS
	LNFIDATNTV TPTASFKPLG LANDTDDYFL RYAVLPREVV CTENLTPWKK LLPCSSKAGL

 Characteristics: Made in Germany - from design to production - by highly experienced protein experts. Mouse Pigt Protein (raised in Insect Cells) purified by multi-step, protein-specific process ensure crystallization grade. State-of-the-art algorithm used for plasmid design (Gene synthesis). This protein is a made to order protein and will be made for the first time for your order. Cexperts in the lab will ensure that you receive a correctly folded protein. The big advantage of ordering our made-to-order proteins in comparison to ordering cust
experts in the lab will ensure that you receive a correctly folded protein.
The big advantage of ordering our made-to-order proteins in comparison to ordering cust
made proteins from other companies is that there is no financial obligation in case the processed or purified.
In the unlikely event that the protein cannot be expressed or purified we do not charge an
(other companies might charge you for any performed steps in the expression process for
custom-made proteins, e.g. fees might apply for the expression plasmid, the first express
experiments or purification optimization).
When you order this made-to-order protein you will only pay upon receival of the correctly
folded protein. With no financial risk on your end you can rest assured that our experience
protein experts will do everything to make sure that you receive the protein you ordered.
The concentration of our recombinant proteins is measured using the absorbance at 280
The protein's absorbance will be measured in several dilutions and is measured against it
specific reference buffer.
The concentration of the protein is calculated using its specific absorption coefficient. We
the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification: Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
 In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE.
 Protein containing fractions of the best purification are subjected to second purification through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE ar Western blot.
Purity: >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility: 0.22 µm filtered
Endotoxin Level: Protein is endotoxin free.
Grade: Crystallography grade

Target Details

5	
Target:	PIGT
Alternative Name:	Pigt (PIGT Products)
Background:	Component of the GPI transamidase complex. Essential for transfer of GPI to proteins, particularly for formation of carbonyl intermediates (By similarity). {ECO:0000250}.
Molecular Weight:	57.8 kDa Including tag.
UniProt:	Q8BXQ2
Pathways:	Inositol Metabolic Process
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
