Datasheet for ABIN3125561 COG5 Protein (AA 1-829) (His tag)

Image

Overview

Quantity:	1 mg
Target:	COG5
Protein Characteristics:	AA 1-829
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This COG5 protein is labelled with His tag.
Application:	ELISA, SDS-PAGE (SDS), Western Blotting (WB), Crystallization (Crys)

 Mouse Cog5 Protein (raised in Insect Cells) purified by multi-step, protein-specific proc ensure crystallization grade. 	
 State-of-the-art algorithm used for plasmid design (Gene synthesis).)
This protein is a made to order protein and will be made for the first time for your order. (Jur
experts in the lab will ensure that you receive a correctly folded protein.	-
The big advantage of ordering our made-to-order proteins in comparison to ordering cus	iom
made proteins from other companies is that there is no financial obligation in case the p	
cannot be expressed or purified.	
In the unlikely event that the protein cannot be expressed or purified we do not charge ar	ything
(other companies might charge you for any performed steps in the expression process for	
custom-made proteins, e.g. fees might apply for the expression plasmid, the first express	ion
experiments or purification optimization).	
When you order this made-to-order protein you will only pay upon receival of the correctly	/
folded protein. With no financial risk on your end you can rest assured that our experienc	ed
protein experts will do everything to make sure that you receive the protein you ordered.	
The concentration of our recombinant proteins is measured using the absorbance at 280	nm.
The protein's absorbance will be measured in several dilutions and is measured against i	ts
specific reference buffer.	
The concentration of the protein is calculated using its specific absorption coefficient. W	e use
the Expasy's protparam tool to determine the absorption coefficient of each protein.	
Purification: Two step purification of proteins expressed in baculovirus infected SF9 insect cells:	
 In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE. Protein containing fractions of the best purification are subjected to second purification through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot. 	n step
Purity: >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.	
Sterility: 0.22 µm filtered	
Endotoxin Level: Protein is endotoxin free.

Product Details

Grade:

Crystallography grade

Target Details

Target:	COG5
Alternative Name:	Cog5 (COG5 Products)
Background:	Required for normal Golgi function. {ECO:0000250}.
Molecular Weight:	92.3 kDa Including tag.
UniProt:	Q8C0L8
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C

Expiry Date: Unlimited (if stored properly)

Store at -80°C.

Storage Comment:
