

Datasheet for ABIN3125684 FBXL3 Protein (AA 1-428) (Strep Tag)

Overview

Quantity:	250 µg
Target:	FBXL3
Protein Characteristics:	AA 1-428
Origin:	Mouse
Source:	Cell-free protein synthesis (CFPS)
Protein Type:	Recombinant
Purification tag / Conjugate:	This FBXL3 protein is labelled with Strep Tag.
Application:	Western Blotting (WB), SDS-PAGE (SDS), ELISA

Product Details

Brand:	AliCE®
Sequence:	MKRGGRDSDQ DSAEEGTAEK PKRPRTTQER SQPCDWGNLL QDIVLHVFKY LPLLDRAHAS
	QVCRNWNQVF HMPDLWRCFE FELNQPATSY LKATHPELIK QIIKRHSNHL QYVSFKVDSS
	KESAEAACDI LSQLVNCSLK TLGLISTARP SFMDLPKSHF ISALTVVFVN SKSLSSLKID
	DTPVDDPSLK VLVANNSDTL KLLKMSSCPH VSPAGILCVA DQCHGLRELA LNYHLLSDEL
	LLALSSEKHV RLEHLRIDVV SENPGQTHFH TIQKSSWDAF IKHSPKVNLV MYFFLYEEEF
	DPFFRYEIPA THLYFGRSVS KDVLGRVGMT CPRLVELVVC ANGLRPLDEE LIRIAERCKN
	LSAIGLGECE VSCSAFVEFV KMCGGRLSQL SIMEEVLIPD QKYSLEQIHW EVSKHLGRVW
	FPDMMPTW
	Sequence without tag. The proposed Strep-Tag is based on experience \ensuremath{s} with the expression
	system, a different complexity of the protein could make another tag necessary. In case you
	have a special request, please contact us.

Product Details

Characteristics:

Key Benefits:

- Made in Germany from design to production by highly experienced protein experts.
- Protein expressed with ALiCE® and purified in one-step affinity chromatography
- These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed).
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Expression System:

- ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require posttranslational modifications.
- During lysate production, the cell wall and other cellular components that are not required for
 protein production are removed, leaving only the protein production machinery and the
 mitochondria to drive the reaction. During our lysate completion steps, the additional
 components needed for protein production (amino acids, cofactors, etc.) are added to
 produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- The protein's absorbance will be measured against its specific reference buffer.
- We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.

Purification:	One-step Strep-tag purification of proteins expressed in Almost Living Cell-Free Expression System (AliCE®).
Purity:	> 70-80 % as determined by SDS PAGE, Western Blot and analytical SEC (HPLC).
Grade:	custom-made

Target Details

Target:	FBXL3
Alternative Name:	Fbxl3 (FBXL3 Products)
Background:	F-box/LRR-repeat protein 3 (F-box and leucine-rich repeat protein 3A) (F-box/LRR-repeat protein 3A) (Protein after-hours) (Protein overtime),FUNCTION: Substrate-recognition component of the SCF(FBXL3) E3 ubiquitin ligase complex involved in circadian rhythm function. Plays a key role in the maintenance of both the speed and the robustness of the circadian clock oscillation. The SCF(FBXL3) complex mainly acts in the nucleus and mediates ubiquitination and subsequent degradation of CRY1 and CRY2. Activity of the SCF(FBXL3) complex is counteracted by the SCF(FBXL21) complex. {ECO:0000269 PubMed:17462724, ECO:0000269 PubMed:17463252, ECO:0000269 PubMed:18953409, ECO:0000269 PubMed:23452855, ECO:0000269 PubMed:23452856, ECO:0000269 PubMed:23616524, ECO:0000269 PubMed:26776516}.
Molecular Weight:	48.7 kDa
UniProt:	Q8C4V4
Pathways: Application Details	Photoperiodism
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.
Comment:	ALICE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require post-translational modifications. During lysate production, the cell wall and other cellular components that are not required for protein production are removed, leaving only the protein production machinery and the mitochondria to drive the reaction. During our lysate completion steps, the additional components needed for protein production (amino acids, cofactors, etc.) are added to produce something that functions like a cell, but without the constraints of a living system - all that's needed is the DNA that codes for the desired protein!

Handling

Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer. Standard Storage Buffer: PBS pH 7.4, 10 % Glycerol Might differ depending on protein.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	12 months
